With independent living, residents are able to leave the hassles of home maintenance behind and focus on the passions they'd like to pursue in retirement.

Assisted living residents will receive the help they need – whether it's with dressing, bathing or medication management – to help them maintain their independence for as long as possible.

A team of highly-trained Alzheimer's and dementia care associates will provide around-the-clock monitoring and personalized plans to help each resident in the memory care community reach a higher quality of life.

The three-story, 150,000 square-foot building will house more than 100 apartments with a variety of floor plan options.

Astral at Franklin boasts a signature dining experience and close proximity to shopping, restaurants and recreational destinations, along with a wide range of enriching wellness activities.

Sterling Group, a multi-family housing developer based out of Mishawaka, Ind., is responsible for bringing the \$32 million project to Franklin. American Structurepoint is the architect for the upscale farmhouse-style design, which was built by Nelson Construction. [Franciscan Advisory Services](#) will manage the senior living community.
