The pandemic has dampened growth in many economies across sectors. The impact of the Covid-19 pandemic remained negative for major players in the acne drugs market. However, many dermatologists' clinics are facing difficulties due to the lockdown, which has reduced the number of patient visits to the clinics. However, the use of telemedicine is compensating for this adverse effect in some ways.

Increasing prevalence of acne worldwide, unhealthy urban lifestyle, increase in pollution and focus on skin care products are the major factors driving the market growth. However, the side effects associated with acne medications and enhancements and the presence of alternative treatment options such as laser therapy hinder the market growth.
