The powered agriculture equipment market consists of sales of powered agriculture equipment by entities (organizations, sole traders, and partnerships) used by farmers for cultivation in farming, including cultivation, weeding, sowing, and tillage. Powered agriculture equipment refers to the tools that farmers use in farming and agriculture.

## [Global Powered Agriculture Equipment Market Trends](#)

Product innovation is a key trend gaining popularity in the powered agriculture equipment industry. Many companies operating in the powered agriculture equipment market are developing new products to increase crop productivity and household incomes. For instance, in January 2022, John Deere, a US-based manufacturer of agricultural machinery, showcased a fully autonomous tractor during a press conference at CES 2022. The self-driving tractor has a specific purpose of feeding the globe. The autonomous tractor is equipped with six stereo cameras that allow for 360-degree obstacle detection and distance computation.
