The sensitive toothpaste market consists of sales of sensitive toothpaste by entities (organizations, sole traders, and partnerships) that are used to reduce dental hypersensitivity towards certain stimuli, such as hot or cold sensations. Sensitive toothpaste contains ingredients such as potassium nitrate, stannous fluoride, and strontium chloride that are capable of blocking and building resistance in tooth nerves or sensors that respond to heat, cold, and sugar regularly used over a period of time.

Global Sensitive Toothpaste Market Trends

Technological advancement is a key trend gaining popularity in the sensitive toothpaste market. Major companies operating in the sensitive toothpaste market are focused on developing new technological solutions to reinforce their position in the market.
