The project was birthed with the wants and needs of users in mind. A platform that offers features from different top players in the dating app industry enabling a high adoption rate with less potential to switch to a different application; and this is due to the fact that users switch between services over a period of time because each of these top applications have different features, but users can't get them all on a single platform. The company, whose primary goal is to reposition the online dating world through its operations, is offering more features through which people can become more inclined and comfortable while using the service.
