

Antipyretics Market to Reach US\$3.1 Billion by 2027: IndustryARC

Long-Covid Cases Along with Heightened Medical Awareness of the Product Class have Provided Growth Prerogatives to the Antipyretics Market.

HYDERABAD, TELANGANA, INDIA,
September 30, 2022 /

EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Antipyretics Market](#) Size is estimated to reach \$3.1

billion by 2027 and it is poised to grow at a CAGR of 1.6% over the forecast period of 2022-2027. Antipyretics

agents have been used for over

millennia to suppress fever from bacterial infection or viral fever. The essential elements of the fever physiologic pathway are the release of pyrogenic cytokines by inflammatory cells in response to some exogenous pyrogen (infection) and induction of cyclooxygenase (COX) 2 activation of the arachidonic acid cascade. The report offers a complete analysis of the market, its major segments, growth factors, trends, drivers and challengers, key players and more.

Key takeaways :

This IndustryARC report on the Antipyretics Market highlights the following areas -

1. Geographically, North America held a dominant market share in the year 2021. It is owing to the strong demand curated by the U.S. leveraging stupendous medical budget sanctions and overall drug awareness and health infrastructure. However, Asia-Pacific is estimated to be the fastest-growing region owing to a rising patient pool, with a considerable rise in fever-related diseases and geriatric population.

Market Research Reports, Business Consulting
Services & Analytics

2. The growing number of viral and bacterial infections supported by the recent pandemic trends and assistance in other ailments drives the market growth. However, growing medicine prices owing to higher input costs impede the overall market growth.

3. A detailed analysis of strengths, weaknesses, opportunities and threats will be provided in the Antipyretics Market Report.
