

The Debt Repayment App That Helps You Pay Your Mortgage Faster

The Shark Tank investment-winning app, Changed, is launching a feature to help quickly pay off mortgages, saving them thousands of dollars in the process.

CHICAGO, ILLINOIS, USA, October 3, 2022 /EINPresswire.com/ -- The Shark Tank investment-winning round-up savings app, Changed, is launching a brand-new feature to help users quickly pay off their mortgages, saving them thousands of dollars in the process. This ground-breaking new method of saving has already helped many strategically and simply pay back all types of debt, including \$25 million in student loans.

Founders on Shark Tank

With mortgage interest rates skyrocketing and financial uncertainty trapping many, the launch of Changed's new feature is perfectly timed. It's a simple yet unbelievably impactful concept.

Whenever you make a payment, the Changed round-up savings app will take it up to the nearest dollar, saving the additional amount. So, if you spend \$4.49 on a coffee, Changed will round that to \$5.00 and save \$0.51. Now, imagine you buy a coffee every day – that's a saving of \$186.15 per year. Even the smallest value transactions will help you save thousands in interest.

“

We thought there has to be a better, quicker, and easier way to pay back what we'd borrowed.”

Founders of Changed

Approximately 200 million Americans carry some form of debt, with little assistance and education to strategically

pay back debt. As first-generation Americans, Dan and Nick, the founders of Changed, found themselves in a mountain of student debt but came up with an inventive idea of how to save, and Changed was born.

“Repaying our debt became nothing but hassle,” they told us. “We thought there has to be a

better, quicker, and easier way to pay back what we'd borrowed. Our process was to discover a method of saving that wouldn't negatively impact our day-to-day lives but would enable us to save more than ever. As soon as we realized the positive change our new method had, we knew we had to share it with anyone else in our position, so we made an app that rounds up purchases and puts them in savings. From there, with the help of our members, we built a fully featured service that helps track and pay off debt sooner"

Impressively, Changed users have saved a total of \$50 million in interest payments and taken decades off their loan repayment. This simple concept has enabled people who thought they didn't have the ability to save to release themselves from debt that was stressing them out.

Through traditional financial education, most of us aren't equipped with the personal finance knowledge and skills to manage debt. As first-generation Americans raised by a single mother, Dan and Nick quickly learned the power of every cent. Now, with Changed, anyone can harness the power of small savings to Do Debt Differently.

About Changed

Changed is on a mission to make debt repayment easier. It rewires how people perceive savings, making it an automated and pain-free process that we don't have to plan. Back in 2018, the company appeared on Shark Tank, winning an investment from Mark Cuban. Since then, interest in the savings and [debt repayment app](#) has exploded, with users saving a total of \$25 million and avoiding \$50 million in interest. What's more, on average, people have been able to pay off their debt 40% faster than they would without Changed.
