COVID-19 Impact Analysis:

The COVID-19 crisis has caused years of change within the way companies altogether sectors and regions do business. Companies have accelerated the digitization of their customer and supply-chain interactions and their internal operations by three to four years and therefore the share of digital or digitally enabled products in their portfolios has accelerated by a shocking seven years. Nearly all companies have stood up a minimum of temporary solutions to satisfy many of the new demands on them, and far more quickly than that they had thought possible before the crisis.

During the pandemic, Telecom & ITs have moved dramatically toward online channels, and corporations and industries have responded successively. The studies confirm the rapid shift toward interacting with customers through digital channels. They also show that rates of adoption are years before where they were when previous studies were conducted and even more in developed Asia than in other regions.
