

# Global Digital PCR (dPCR) and Real-time PCR (qPCR) Market Will Grow Over CAGR 8% During The Forecast Period

According to the report, the demand for the Digital PCR (dPCR) and Real-time PCR (qPCR) market is expected to reach a CAGR of 8.10% between 2019 and 2025.

SARASOTA, NEW YORK, UNITED STATES, October 3, 2022 /EINPresswire.com/ -- Zion Market Research has published a new report titled "[Global Digital PCR \(dPCR\) and Real-time PCR \(qPCR\) Market](#) - By Product & Services (Instruments, Reagents & Consumables, and Software & Services), By Application (Clinical, Research, and Forensics), By End-User (Hospitals and Diagnostic Centers, Research Laboratories and Academic Institutes, Pharmaceutical and Biotechnology Companies, Clinical Research Organizations, and Forensic Laboratories), and By Region: Global Industry Perspective, Comprehensive Analysis, and Forecast, 2019 - 2025."

□□□□□□ □□□□

According to the report, the global demand for the Digital PCR (dPCR) and Real-time PCR (qPCR) market was valued at over USD 4,113.10 Million in 2019 and is expected to reach a CAGR of 8.10% between 2019 and 2025.

qPCR and dPCR reagents & consumables segment is expected to dominate the global Digital PCR (dPCR) and Real-time PCR (qPCR) market during the forecast period

The qPCR and dPCR reagents and consumables category are predicted to dominate the global Digital PCR (dPCR) and Real-time PCR (qPCR) market during the forecast period owing to the increasing applications of qPCR, increasing private-public investments for life sciences research, and the rising number of probe-based multiplex genetic analysis procedures are projected to fuel the expansion of the qPCR reagents and consumables market.

Global Digital PCR (dPCR) and Real-time PCR (qPCR) Market

Digital PCR (dPCR) and Real-time PCR (qPCR) Market

The clinical applications category is estimated to hold the majority of the market share during the forecast period. The reason for the growth of the clinical category is the increasing use of qPCR in disease diagnosis and the focus of public and medical professionals on early & effective disease diagnosis & treatment.

“

Global Digital PCR (dPCR) and Real-time PCR (qPCR) Market Size Will Continue to Grow In The Next Five Years With A 8.10% Compound Average Growth Rate to 2025 Zion Market Research”  
*Zion Market Research*

In addition to this, the mounting incidence of infectious and genetic diseases such as cancer, AIDS, etc. will further supplement the expansion of the Digital PCR (dPCR) and Real-time PCR (qPCR) market.

The technological benefits of digital PCR (dPCR) and real-time PCR (qPCR) such as precision, device sensitivity, high flexibility, and complete quantification of target molecule have increased the use of dPCR among hospitals & diagnostic centers, thereby fuelling the clinical applications.

North America is expected to dominate the global Digital PCR (dPCR) and Real-time PCR (qPCR) market during the forecast period owing to the increasing adoption of the innovative and latest genomic analysis techniques such as advanced qPCR and dPCR products. Furthermore, the escalating availability of R&D funding for genomic research along with the healthy research infrastructure in the region and the expanding use of PCR techniques in forensics & clinical diagnostics are anticipated to boost the market growth during the forecast period. The early commercialization of qPCR/dPCR products in the region is also expected to expand the Digital PCR (dPCR) and Real-time PCR (qPCR) market.

Detailed information on each microplate reader manufacturer may be found in the market landscape. An overview of the business, its financials, revenue generated, market potential, research and development investments, new market initiatives, global presence, production facilities and locations, production capacities, company strengths and weaknesses, product launches, product scope, and application dominance are all included. The above data points are only relevant to the microplate reader market focus of the companies listed.

Most industries across the world have been negative impacts over the last 18 months. This can

Most industries across the world have been negative impacts over the last 18 months. This can

be attributed to significant disruptions experienced by their respective manufacturing and supply-chain operations as a result of various precautionary lockdowns, as well as other restrictions that were enforced by governing authorities across the globe.

The same applies to the global Digital PCR (dPCR) and Real-time PCR (qPCR) Market. Moreover, consumer demand has also subsequently reduced as individuals are now keener on eliminating non-essential expenses from their respective budgets as the general economic status of most individuals has been severely affected by this outbreak.

These aforementioned elements are expected to burden the revenue trajectory of the global Digital PCR (dPCR) and Real-time PCR (qPCR) Market over the forecast timeline. However, as respective governing authorities begin to lift these enforced lockdowns, the global Keyword123 is expected to recover accordingly.
