[The International Aviation Transport Association](#) (IATA) predicts that global air passenger volume will be around one-fifth lower in 2022 than in 2019. However, the volume of goods transported by air is estimated to be 11.7% higher than in 2019 and 4% higher than in 2021. The reason for this growth due to the impact of COVID-19 and other infectious diseases

Vietnam is one of the Asian countries with the most bustling international shipping industry. According to the Ninja Van Group's report, Vietnam is the leading country in Southeast Asia in online shopping with an average number of 104 orders/year/person, proving that the e-commerce market in Vietnam is growing rapidly. With a domestic population of nearly 100 million and 5.3 million abroad, Vietnamese people have a huge demand for international freight. International shipping, however, is not always simple due to the several stages of procedures, onerous paperwork, and potential risks involved in the transportation process.

The demand for transporting goods domestically and abroad is constantly increasing.

AQ SHIP has legal entities and offices in Vietnam & U.S.

In addition, Vietnamese people are interested in international goods as they are looking for higher quality and uniqueness compared to domestic products. According to the above-mentioned report, 73% of survey respondents said they regularly shop on e-commerce shopping platforms, and 59% said they have ordered or shopped on international websites many times. Besides, more and more individuals and SMEs (small and medium-sized enterprises) in Vietnam are looking to putting their products on major global e-commerce sites in order to increase business scale and reach more customers.

AQ SHIP guarantees to provide clients with quality products and attentive services.
