Manufactured Home Industry Production Continues to Grow Year Over Year in August 2022 per Manufactured Housing Association for Regulatory Reform released report that uses official federal data.

[HUD CODE INDUSTRY PRODUCTION GROWS IN AUGUST 2022](#)

The Manufactured Housing Association for Regulatory Reform (MHARR) reports that according to official statistics compiled on behalf of the U.S. Department of Housing and Urban Development (HUD), HUD Code manufactured housing industry year-over-year production increased in August 2022. Just-released statistics indicate that HUD Code manufacturers produced 10,722 homes in August 2022, a 17.9% increase over the 9,087 new HUD Code homes produced August 2021. Cumulative production for 2022 now totals 80,431 homes, a 14.2% increase over the

70,410 homes produced during the same period in 2021.

A further analysis of the official industry statistics shows that the top ten shipment states from the beginning of the industry production rebound in August 2011 through August 2022 -- with cumulative, monthly, current year (2022) and prior year (2021) shipments per category as indicated -- are as shown in the attached graphic.

The August 2022 data results in no changes to the cumulative top-ten shipment list.

The Manufactured Housing Association for Regulatory Reform is a Washington, D.C.-based national trade association representing the views and interests of independent producers of federally-regulated manufactured housing.

There are more facts, analysis and information from MHARR found in the MHPProNews Q&A's with Danny Ghorbani at this link below. Ghorbani is a former vice president at the Manufactured

Housing Institute (MHI). He is also an RV MH Hall of Fame Inductee. Ghorbani is currently the senior advisor to MHARR, but is the Washington, D.C. based association's founding president and chief executive officer (CEO) since 1985.

Among the points that the MHARR senior advisor Ghorbani shared is his strong belief that manufactured housing is unlikely to achieve its goals unless the Manufactured Housing Institute (MHI) is willing to sue to get the industry's rights under federal law enforced. Here is how Ghorbani expressed it: "Under normal circumstances, the ideal entity would be the industry's national and independent post-production association..." i.e.: MHI. But "...maybe all is not lost because MHI, which continues to collect dues and serves as the industry's de-facto post production representation, knows only too well that these post production problems, and particularly the discriminatory and exclusionary zoning laws, not only are not being resolved, but are getting worse, blocking progress and prosperity for its own members and the broader industry as well.

You may recall that I ended my answer to your Question No. 2 by asking MHI if it knows how to fight and win the industry's zoning battles. Now, here we have shown and given them the exact blueprint as to "how" to do this..." the full statement and others related to the means to boost access and sales of affordable manufactured homes are found in the Q&As shown below.

<https://manufacturedhousingassociationregulatoryreform.org/mhpronews-qa-with-danny-ghorbani/duty-to-serve-mh/>

There are also years of insights from MHARR's President and CEO Mark Weiss, J.D. years of published "Issues and Perspectives" found at this link here. Weiss has decades of manufactured housing experience. Few if any others in manufactured housing national association leadership-staff roles have the experience that Weiss has. Weiss has also argued that the industry's professionals should come together to use the legal system to defend the industry's rights in a fashion that would benefit potentially millions of those who desire a manufactured home. Manufactured housing is the most proven and affordable form of permanent housing in the U.S.

See the years of published statements by Weiss, shown from the reports linked from the hub below.
