The radiology as a service market consists of sales of radiology as a service by entities (organizations, sole traders, and partnerships) that help healthcare providers provide advanced diagnostics at an affordable cost, without any adverse effect on their sustainability, and adopt service models in medical imaging. Radiology as a service refers to rendering professional and technical services for radiation oncology, radioisotope services, medical imaging, and so on to allow providers to provide patients with the best possible diagnoses at much lower costs. Care providers are not required to purchase imaging equipment outright, but they collaborate with imaging vendors who provide the imaging equipment and related services on a pay-per-use or periodic basis.

## [Global Radiology As A Service Market Trends](#)

Technological advancements are the key trends gaining popularity in the radiology-as-a-service market. Major companies operating in the radiology-as-a-service sector are focused on introducing new technologies to sustain their position in the market. For example, in January 2021, Nanox, an Israel-based medical imaging technology company, and USARAD, a US-based teleradiology company, introduced an advanced radiology diagnostics service that combines

over 300 expert radiologists with artificial intelligence decision support solutions to support medical diagnostics.

### Global Radiology As A Service Market Segments

The global radiology as a service market is segmented:

By Service Type: Teleradiology, Cloud-based Imaging IT Services, Consulting Services, Technology Management Services
