

Pompe Disease Treatment Market Segmentation, Demand, Development, Size, Growth, Regional Analysis and Research Analysis

Pompe Disease Treatment Market Segmentation, Demand, Development, Size, Growth, Regional Analysis, Research Analysis and Forecast

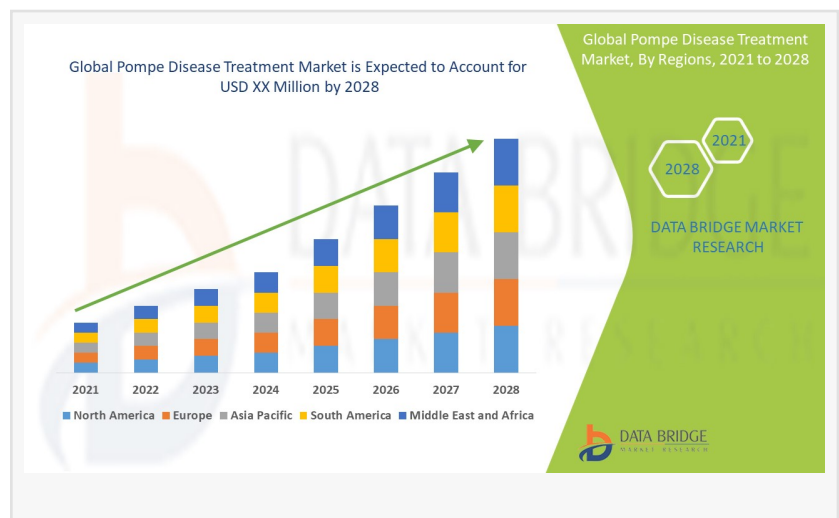

PUN, MAHARASHTRA, INDIA, October 4, 2022 /EINPresswire.com/ -- [Pompe disease treatment market](https://www.einpresswire.com/news/2022/10/04/pompe-disease-treatment-market) is expected to experience market growth over the forecast period 2021-2028. Data Bridge Market Research analyzes the market to account for growth at a CAGR of 4.35% during the aforementioned

forecast period. Pompe disease is a genetic disease that develops due to the buildup of glycogen (complex sugar) in tissues and cells and damages organs and tissues. This disorder causes muscle weakness, muscle atrophy, and other complications, such as trouble breathing and heart problems. The breakdown of glycogen in the body is due to the GAA gene. Changes in this gene lead to the accumulation of glycogen in tissues and organs. In men and women, pump disease occurs in the same proportion.

Rising healthcare infrastructure for pump disease drugs and development of gene therapy and enzyme replacement therapies is the major factor that will influence the growth rate of the market. In addition, the increasing prevalence of pump disease and special regulatory subsidies and orphan drug designations, especially for the treatment of rare diseases, are the factors that will expand the pump therapy market.
