

Military Airlift and Air-to-Air Refuelling 2022 Announcement: Boeing to Deliver Industry Insight

Boeing's International Business Development Capture Team Lead Matt Kaslik will speak at the conference in Florence, Italy, this November.

FLORENCE, LONDON, ITALY, October 4, 2022 /EINPresswire.com/ -- In recent news, Boeing's KC-46A Pegasus tanker is now approved for worldwide deployment, including in support of combat operations, according to the U.S. Air Force's Air Mobility Command (AMC).

The development follows a recent combat employment concept exercise and wraps up a 15-month Interim Capability Release that ensures the tanker could refuel all aircraft, Air Force officials said.

The KC-46A represents the Air Force's first phase of recapitalizing its aging tanker fleet and is capable of refueling most fixed-wing, receiver-capable aircraft, as well as airlifting up to 65,000 pounds of cargo. *

SAE Media Group is delighted to announce Boeing returns to support the [Military Airlift and Air-to-Air Refuelling](#) conference as a Lead Sponsor. Their senior representative, Matt Kaslik will be the first industry speaker on the agenda with a discussion on how Boeing supports aerial refuelling well into the 21st Century.

Kaslik is an International Business Development Capture Team Lead for Boeing Defense within the Mobility and Surveillance sector focusing on the European theater.

MILITARY AIRLIFT AND AIR-TO-AIR REFUELLING

📅 29-30 NOVEMBER 2022 📍 FLORENCE, ITALY

Discussion Topic :

"SUPPORTING AERIAL REFUELING WELL INTO THE 21ST CENTURY"
