Smart Agriculture speakers

“

The second edition of the Smart Agriculture livestream is awaited by a large community, and it is a pleasure for us to meet their needs and desires and to facilitate encounters in the Mext metaverse”

Hanene Maupas, CEO of Mext

Smart agriculture refers to the usage of technologies such as IoT, wireless sensors, Real-time Location, Tracking, Predictive analysis and Intelligent decisions, robots, and drones on farms to increase precision, control and crop yields for better productivity and sustainability. Smart Agriculture may also play an important role in transforming and adapting agricultural development to the new reality of climate change.

In this conference, we will focus on getting the latest innovation and trends in Smart Agriculture development to help our high-tech community, to face its major new

challenges for companies, build their roadmap and find their next partners. We will deep dive, from Smart Farming Technology Trends to Smart Agriculture impacts.

Among the speakers, you will meet technology leaders of the transportation and logistics

industry as well as most recognized startups with disruptive technologies.

To learn about the event speakers and attendees, please visit our LinkedIn event page by clicking on this link <https://www.linkedin.com/events/6858741866939072512/>
