

Phase One Expands Cultural Heritage Digitization Support

First Phase One Copy Stand Supporting Large Format Digitization Solution

COPENHAGEN, October 6, 2022 /EINPresswire.com/ -- [Phase One](#) today introduced the [RPS 2300XXL AutoColumn copy stand](#) for large format digitization projects. Designed with a large, super-stable metal base measuring 1300x1000mm, this copy stand supports objects larger than A0. This newly configured large format copy stand is designed to meet the growing needs of museum, archives, and digitization services seeking to preserve and conserve manuscripts or artifacts.

When used with the Phase One iXH 150MP camera, it is easier and more convenient than ever to achieve 300ppi reproduction while meeting the strictest FADGI, Metamorfoze and ISO 19264 digitization guidelines. It offers Phase One's motorized AutoColumn technology, allowing all steps to be automated through Capture One Cultural Heritage software, resulting in a more efficient and effective digitization workflow with maximum output.

"This is an essential new addition to our offering, expanding Phase One's flat art reproduction solutions with a copy stand for large format objects," said Eric Joakim, Phase One Cultural Heritage Portfolio Manager. "Being able to offer our innovative AutoColumn technology for large format digitization projects comes with significant time and workflow efficiencies and follows our mission to optimize digitization outputs across the board."

The RPS 2300XXL copy stand base comes with a set of heavy-duty, lockable castor wheels and an RPS-175 arm extension, providing accurate and stable camera positioning and support. For large, flat, and thin objects such as maps, newspapers and drawings, a metal cover board is included

that can be mounted onto the base, allowing for careful and secure positioning with magnets. A utility shelf under the baseboard provides a convenient solution for placing the controller box and other tools and accessories.

Webinar Invitation

See the new copy stand in our upcoming webinar about scaling large format digitization projects. Eric Joakim will present the new set-up and streamlined workflow, showcasing the ease-of-use of the AutoColumn technology, when handling larger than A0 objects. Register here for the demonstration: https://phaseone.ws/webinar_large_format
