Food Authenticity Market by Target testing, Technology, and Food Tested: Global Opportunity Analysis and Industry Forecast, 2021–2030," the global food authenticity market was valued at \$5.3 billion in 2017, and is estimated to reach \$10.0 billion by 2030, registering a CAGR of 6.9 % from 2021 to 2030. In 2017, the (PCR) polymerase chain reaction technology segment accounted for more than one-third share of the total food authenticity market.

Increased economically motivated adulterations (EMA) due to high competition and rise in incidence of food frauds globally are the prime factors that boost the growth of the global food authenticity market in the near future.

Increased economically motivated adulterations (EMA) due to high competition and rise in incidence of food frauds globally are the prime factors that boost the growth of the global food authenticity market in the near future. Various regulations on food safety particularly in the developed economies, growth in instances of food fraud, and rise in economically motivated adulterations (EMA), owing to high competition among food producers drive the food authenticity market. However, high cost of food authenticity, availability of relatively cheap substitutes, and anti-dumping policies on food authenticity are expected to hamper the food authenticity industry growth.
