CBD patches are transdermal patches containing cannabidiol (CBD). They slowly release CBD into the bloodstream through the skin. Some people may prefer this CBD delivery system to inhaling vaporized CBD or ingesting it orally via edibles or drinks. CBD patches may be a more suitable option for certain applications, such as treating pain, although personal preference will play a role in choosing the best way to take CBD. This transdermal method delivers the CBD quickly to the local area around the patch. From there, it works its way into the bloodstream. When people take CBD orally - via an oil or gummy, for example - the compound must first pass through the digestive system. The body may then use it, break it down, or even simply excrete it as waste. As such, much of an oral CBD dose may be lost in the digestive system.

CBD Patch Market Scope and Market Size

The CBD Patch market is segmented on the basis of the product, species, packaging, dosage, derivative, application, source type, end user and distribution channel. The growth among segments helps you analyze niche pockets of growth and strategies to approach the market and determine your core application areas and the difference in your target markets.

On the basis of product, the CBD Patch market is segmented into reservoir, matrix and layer

drug-in-adhesive. In 2021, reservoir segment is dominating the CBD Patch market due to its use in varied CBD applications and its steady and controlled release for longer period of time. On the basis of species, the CBD Patch market is segmented into cannabis indica, hybrid and sativa. In 2021, cannabis indica segment is dominating the CBD Patch market due to its high CBD and low THC percentage as compared to sativa and hybrid. As many regions have a limit in the use of THC in products, cannabis indica is preferred.

On the basis of packaging, the CBD Patch market is segmented into two to five patches, single patch and more than five patch. In 2021, two to five patches segment is dominating the CBD Patch market due to its high availability and the discounts offered by manufacturers on a bundle of patches in this range.

On the basis of dosage, the CBD Patch market is segmented into below 30 mg, 30-40 mg, 40-50 mg and above 50 mg. In 2021, below 30 mg segment is dominating the CBD Patch market as the market is at its initial stages and new consumers start with low dosage and then increase as per the requirement.
