NCH Software's Newest WavePad and Pixillion Releases Improve Business and Personal Productivity

NCH Software announces new software releases. In addition to security updates and performance enhancements, many new features are highlighted below.

GREENWOOD VILLAGE, COLORADO, UNITED STATES, October 6, 2022 /EINPresswire.com/ -- Wavepad, NCH's award winning audio engineering software, features one of the most powerful and dynamic FFT sound analyzers available anywhere. Wavepad is the number one choice for sound engineers everywhere. The newest release provides the ability to:
-easily and cleanly separate and remove vocals from song tracks

> **"** WavePad packs a big audio punch. WavePad supports a variety of popular audio formats ... All told, this utility's many capabilities and lack of restrictions make it a fine pick...."
>
> *CNET*

-save time by applying new effects and conversions to multiple files at once
-restore audio quality with refined noise removal
-enhance your audio tracks with tons of new and powerful effects and filters

Pixillion is one of the most comprehensive and easy to use multi-format image converters available. The latest release provides the ability to:
-save time by allowing conversion or compression of multiple images at once
-directly email converted images
-add effects, text captions and watermarks to your images
-easily resize, rotate and crop digital photos
