Data Bridge Market Research analyses that the pulse oximeters market to be grow at a CAGR of 7.9% in the forecast period of 2022-2029 and is likely to reach the USD 3.94 billion by 2029. A pulse oximeter is a medical gadget that measures the amount of oxygen in a patient's blood. It is a little clip-like device that is externally connected to an individual's finger, toe, or earlobe to detect the timing and amounts of oxygen deficiency. It is often used in hospital wards to measure pulse during surgical procedures, emergencies, treatments, and recovery. The device uses a cold light source to estimate the percentage of oxygen in red blood cells by transmitting light through the point of contact and analyzing the amount of light that can pass to reach the other end.
