COVID-19 Impact Analysis:

The restrictions imposed by various nations to contain COVID had stopped the demand and supply, resulting in a disruption across the whole supply chain. However, the global markets are slowly opening to their full potential and there's a surge in demand. The market would remain bullish in upcoming year. The significant decrease in the Global Handheld Imagers market size in 2020 is estimated on the basis of the COVID-19 outbreak and its negative impact on the

economies and industries across the globe. Various scenarios have been analyzed on the basis of inputs from various secondary sources and the current data available about the situation.

## Growth Factors

Development of advanced microbolometers and increasing IT consumerization are the most prominent reasons likely to drive the growth of handheld imagers market in years to come, as per analysts at Zion Market Research. Apart from this, high investment for enhancement of camera-supported scanners also adds to the development of handheld imagers market. A new generation of competitive & advanced barcode reader scanner has exceptional industrial features & standards to elevate productivity, accuracy, and user-friendly operation, boosting the handheld imagers market. On the other hand, they are obtainable at competitive costs. Camera-supported solutions are user-friendly and offer high cost-performance ratio. This is further likely to offer new opportunities for growth of handheld market in years to come.
