

Eye and Face Protection Market is Expected to reach the value of USD 58,786 million by 2025, at a CAGR of around 4.63%

eye and face protection market was around USD 42,670 mn in 2018 & is expected USD 58,786 mn by 2025, at a CAGR of around 4.63% between 2019 and 2025.

SUITE N202, FLORIDA, UNITED STATES, October 7, 2022 /EINPresswire.com/ -- Zion Market Research has published a new report titled "[Global Eye and Face Protection Market](#)

By Product Type (Eye Spectacles, Goggles, Welding Shields, Laser Safety Goggles, and Face Shields) and By Application (Manufacturing, Construction, Oil and Gas, Transportation, Pharmaceuticals, Chemicals, Food, Mining Agriculture, and Defense & Maritime): Global Industry Perspective, Comprehensive Analysis, and Forecast, 2018–2025".

According to the report, the global eye and face protection market was around USD 42,670 million in 2018 and is expected to reach approximately USD 58,786 million by 2025, at a CAGR of around 4.63% between 2019 and 2025.

“

The global eye and face protection market is expected to reach approximately USD 58,786 million by 2025, at a CAGR of around 4.63% between 2019 and 2025.”

Zion Market Research

Eye and face protection is commonly used for injuries caused by sparks, chemicals, metals, etc. falling into or flying inside the eyes. Eye and face protection hazard protection includes industrial welding goggles, laser safety goggles, face shields, eye specials, etc. Facial protection protects the respiration system from industrial vapors, fog,

smog, sprays, and other harmful gases. Hazardous materials can cause cancer, respiratory diseases, and even death.

Moreover, safety glasses protect the eyes with safety frames and impact-resistant lenses. Goggles protect and cover the eye and their surrounding area by protecting them from impact, dust, and sudden splashes of any kind. Face shields are transparent plastic sheets that cover the entire face and are also called headgear. These headgears offer protection against nuisance dust and hazardous liquid but do not provide adequate protection against impact hazards. Laser safety goggles provide protection from laser radiation.

Eye and Face Protection Market Size

The global eye and face protection market is likely to grow significantly in the future owing to the increasing number of industrial and environmental hazards. The injuries caused by these hazards could be temporary or permanent. Thus, to reduce these injuries, governments and industrial departments have set some industrial guidelines to maintain a hazard-free industrial environment. To maximize work protection, eye and face protection is provided by various companies, which is fueling the global eye and face protection market.

Global Eye and Face Protection Market Size

The global eye and face protection market is fragmented into product types and applications. By product type, the global eye and face protection market includes eye spectacles, laser safety goggles, goggles, welding shields, and face shields. In 2018, eye spectacles and goggles accounted for around 70% of the global market share. This can be attributed to the increasing eye spectacles demand from chemical and metal industries to protect eyes and face while industrial work and the high demand for environment protective goggles. By application, the global eye and face protection market includes pharmaceuticals, transportation, oil and gas, construction, mining agriculture, food, manufacturing, defense and maritime, and chemicals. The manufacturing and construction sectors held the largest shares of the global eye and face protection market in 2018, owing to the protective use of goggles while manufacturing metal equipment.

By region, the North American eye and face protection market is projected to grow substantially and hold the largest share in the future, owing to various industrial obligations and government policies, improved industrial productivity, and workers' health. The Asia Pacific eye and face protection market is likely to show lucrative growth over the forecast time period, due to the presence of developing countries like China and India, rapid urbanization, and rising regional
