Dairy herd management refers to a technique that is utilized for tracking the health and productivity of the dairy animals. They usually use the techniques which are used in the smart farming and are also considered cost effective in nature. These widely deployed in applications such as heat stress management, large scale dairy farms, and health management, among others.

The major players covered in the dairy herd management market report are eLaval Inc., GEA Group Aktiengesellschaft, Afimilk Ltd., BouMatic., Fullwood Packo, SCR, DAIRYMASTER, Lely, VAS, SUM-IT, Pearson International LLC, FarmWizard., Waikato Milking Systems NZ LP., Trioliet, FBS Systems Inc., Infovet, Stellapps Technologies Private Limited, UNIFORM-Agri, and Madero Dairy Systems S. A. de C. V., among other domestic and global players.

The expansion of herd size of dairy farms across the globe acts as one of the major factors driving the growth of dairy herd management market. The increase in demand for smart farming technique in order to increase overall efficiency and productivity, and rise in production and consumption of milk and dairy products accelerate the market growth. The substantial cost savings associated with dairy herd management products and rise in funding investments towards the development of dairy farms further influence the market. Additionally, technological advancements, rapid urbanization, digital innovation and government initiatives toward dairy herd management positively affect the dairy herd management market. Furthermore, advancements in the management extend profitable opportunity to the market players in the forecast period of 2021 to 2028.

[Global Dairy Herd Management Market](#) Scope and Market Size

The dairy herd management market is segmented on the basis of product, farm size and application. The growth amongst these segments will help you analyze meagre growth segments in the industries, and provide the users with valuable market overview and market insights to help them in making strategic decisions for identification of core market applications.

On the basis of product, the dairy herd management market is segmented into automated dairy herd management systems and software.

On the basis of farm size, the dairy herd management market is segmented into small-scale dairy farms, medium-scale dairy farms, and large-scale dairy farms.

On the basis of application, the dairy herd management market is segmented into milk harvesting, feeding, breeding, cow comfort and heat stress management, calf management, health management, and other application.

The report provides insights on the following pointers:

Market Penetration: Comprehensive information on the product portfolios of the top players in the Dairy Herd Management Market Industry

Product Development/Innovation: Detailed insights on upcoming technologies, R&D activities, and product launches in the market

Competitive Assessment: In-depth assessment of the market strategies, and geographic and business segments of the leading players in the market

Market Development: Comprehensive information about emerging markets. This report analyzes the market for various segments across geographies

Market Diversification: Exhaustive information about new products, untapped geographies, recent developments, and investments in the Dairy Herd Management Market

Healthcare Infrastructure growth Installed base and New Technology Penetration

The dairy herd management market also provides you with detailed market analysis for every country growth in healthcare expenditure for capital equipment, installed base of different kind of products for dairy herd management market, impact of technology using life line curves and changes in healthcare regulatory scenarios and their impact on the dairy herd management market. The data is available for historic period 2010-2019.

Competitive Landscape and Dairy Herd Management Market Share Analysis

The dairy herd management market competitive landscape provides details by competitor. Details included are company overview, company financials, revenue generated, market potential, investment in research and development, new market initiatives, global presence, production sites and facilities, production capacities, company strengths and weaknesses, product launch, product width and breadth, application dominance. The above data points provided are only related to the companies' focus related to dairy herd management market.

Table of Content:

Section 01: Executive Summary

Section 02: Scope of the Report

Section 03: Research Methodology

Section 04: Introduction

Section 05: Dairy Herd Management Market Landscape

Section 06: Dairy Herd Management Market Sizing

Section 07: Five Forces Analysis

Section 08: Market Segmentation by Product

Section 09: Market Segmentation by Application

Section 10: Customer Landscape

Section 11: Market Segmentation by End-User

Section 12: Regional Landscape

Section 13: Decision Framework

Section 14: Drivers and Challenges

Section 15: Market Trends

Section 16: Competitive Landscape

Section 17: Company Profiles

Section 18: Appendix
