The key highlights of the report include:

Market Overview (2017-2027)

Historical Market Size (2020): USD 1.7 Billion

Forecast CAGR (2022-2027): 8.0%

Forecast Market Size (2026): USD 2.7 Billion

Driving simulators, through the virtual environment, help in training a driver to be skilled in handling the vehicle to safety in different conditions. It helps to teach how to avoid collision from

all angles. This cannot be practised in an actual scenario.

Therefore, the need for driving simulators is popular. Additionally, the demand for driving simulator is propelled by the growing search for skilled drivers to ensure safety as the incidence of road accidents caused by human errors rise. Benefits of investment and introduction of more advanced technologies is also expected to aid the driving simulator market in the forecast period.

Industry Definition and Major Segments

Driving simulator refers to a device that creates a virtual environment with the help of artificial intelligence for the purpose of driver's education. These also have sensors to track the response time, efficiency in vulnerable circumstances, and attention of the rider. Mostly, these simulators consist of physical mock-ups like steering wheel, gearshift, and pedals, allowing the user to feel a life-like experience of driving.

On the basis of vehicle type, the market is segmented into:

- Passenger Vehicle
- Commercial Vehicle

Based on simulator type, the market is divided into:

- Compact Simulator
- Full-Scale Simulator
- Advanced Simulator

The market is divided into the following, based on application:

- Training
- Motor Sports and Gaming
- Research and Testing

The end use segments encompass:

- Automotive
- Marine
- Aviation

The major regional markets include:

North America
Europe
Asia-Pacific
Latin America
Middle East and Africa

Market Trends

Asia Pacific has been witnessing a growing trajectory in terms of automotive manufacturing and sale owing to factors like improving lifestyle, increasing number of metro cities, growing population, among others. This has led to rising demand for driving simulator. Furthermore, strict vehicle and road safety laws are projected to be implemented in countries including China, Japan, India, and South Korea, which is anticipated to boost the market in the forecast period in these regions.

Other than civilians, police, firemen, ambulance drivers and military troops are also benefitted with the use of driving simulators. Made from modern technology like 3D visualisation, it helps these professionals to improve on their response skills during emergencies. Growing adoption of driving simulators for the same is also observed to positively catalyse the market.

Key Market Players

The major players in the market are Thales Group, Moog Inc., AVSimulation, Ansible Motion Limited, L3Harris Technologies, Inc., CAE Inc., and Boeing, among others.

About Us:

Expert Market Research (EMR) is leading market research company with clients across the globe. Through comprehensive data collection and skilful analysis and interpretation of data, the company offers its clients extensive, latest and actionable market intelligence which enables them to make informed and intelligent decisions and strengthen their position in the market. The clientele ranges from Fortune 1000 companies to small and medium scale enterprises.

EMR customises syndicated reports according to clients' requirements and expectations. The company is active across over 15 prominent industry domains, including food and beverages, chemicals and materials, technology and media, consumer goods, packaging, agriculture, and pharmaceuticals, among others.

Over 3000 EMR consultants and more than 100 analysts work very hard to ensure that clients get only the most updated, relevant, accurate and actionable industry intelligence so that they may formulate informed, effective and intelligent business strategies and ensure their leadership in the market.
