The global surgical lasers market is anticipated to grow with a CAGR of ~13% during the forecast period, i.e., 2022-2031. On the basis of application, the market is segmented into aesthetic, dentistry, cardiology, gynecology, and others. On account of the high adoption of surgical lasers for dental treatment, the dentistry segment represents the largest market share in the global surgical lasers market. Additionally, a rise in the prevalence of gum disease in the population is also anticipated to lead to an increase in the demand for dental surgical lasers during the forecast period.

The global surgical laser market is expected to generate significant revenue during the forecast period. The increasing adoption of surgical lasers in dentistry as well as cardiology applications, along with the numerous benefits associated with the use of these surgical lasers such as rapid

relief, zero blood loss, and faster healing, are some factors expected to propel the expansion of the market during the forecast period. Moreover, the [demand for minimally invasive surgery](#) for rising chronic diseases such as cancer is estimated to fuel the demand for surgical lasers over the forecast period. According to data released by the World Health Organization, cancer is the leading cause of death worldwide and was responsible for nearly ten million deaths in 2020.

Geographically, the global surgical lasers market is segmented into five major regions, including North America, Europe, Asia Pacific, Latin America, and the Middle East & Africa region. healthcare Infrastructure expansion, technological advancements, and increasing cosmetic surgery procedures are some of the key factors expected to fuel the growth of the surgical lasers market in the North American region during the forecast period. For instance, in 2022, the USA's annual health care costs per capita were estimated to be approximately 10 thousand U.S. dollars

The research is global in nature and covers detailed analysis on the market in North America (U.S., Canada), Europe (U.K., Germany, France, Italy, Spain, Hungary, Belgium, Netherlands & Luxembourg, NORDIC [Finland, Sweden, Norway, Denmark], Poland, Turkey, Russia, Rest of Europe), Latin America (Brazil, Mexico, Argentina, Rest of Latin America), Asia-Pacific (China, India, Japan, South Korea, Indonesia, Singapore, Malaysia, Australia, New Zealand, Rest of Asia-Pacific), Middle East and Africa (Israel, GCC [Saudi Arabia, UAE, Bahrain, Kuwait, Qatar, Oman], North Africa, South Africa, Rest of Middle East and Africa). In addition, an analysis comprising market size, Y-O-Y growth & opportunity analysis, market players' competitive study, investment opportunities, demand for future outlook etc. has also been covered and displayed in the research report.

High Prevalence of Vision Disorders to Drive Market Growth

As per the data released by the World Health Organization, more than 2.2 billion people in the world suffer from poor vision that affects their ability to see at distances or near distances.

The rapid advancement of laser technology and the high incidence of vision impairment is also expected to fuel the market growth over the forecast period. Additionally, increasing cases of eye disorders resulting in increased adoption of laser treatments are also expected to enhance the growth of the global surgical laser market during the forecast period.
