Key Market Analysis and Insights:

Proctitis is an inflammatory disease. It develops in the lining of the rectum caused by trauma to the anorectal area. This condition develops due to anal sex or the insertion of objects or harmful substances. Severe bleeding, anemia, ulcers, and fistulas are the common symptoms of proctitis and there can be severe problems if left untreated.

The proctitis treatment is supportive and aims to reduce the severity of the symptoms. Data Bridge Market Research analyses that the proctitis market will grow at a CAGR of 6.90% during the forecast period of 2022 to 2029.

Proctitis Market Dynamics

Drivers

Inflammation

Surging incidence rate of inflammation in patients or inflammatory diseases as a result of anal sex is directly propelling the demand for effective medical treatment. Increasing transmission of sexually transmitted diseases can result in the development of proctitis and therefore, call for an effective and advanced treatment.

Increasing investment for healthcare infrastructure

Another significant factor influencing the market's growth rate is the rising healthcare expenditure, which helps in improving its infrastructure. Growth and expansion of healthcare industry especially in the developing economies would invite the use and application of new and advanced medical technologies, equipment and drugs. This will directly increase the demand for proctitis treatment.

Research and development activities

Growing number of strategic collaboration between public and private market players is inducing growth in the number of research and development activities on daily basis. These research and development proficiencies are being conducted in novel drugs and medical technologies that will propel the demand for proctitis treatment.

Furthermore, unhealthy sexual habits or unsafe sexual intercourses, rising initiatives by public and private organizations to spread awareness and increasing cases of inflammatory bowel disease and ulcerative colitis are the factors that will expand the market growth rate. Other factors such as the increase in the demand for effective therapies, availability of cost-effective drugs and rising adoption rate for early diagnostic procedures will positively impact the market's growth rate.
