### Significant Advancement in Veterinary Science to Drive the Market Growth

According to research, veterinarians are now able to gather more detailed data and provide a more precise diagnosis coupled with the availability of 3D images in ultrasound and MRI scans. The technology and image format also facilitate information sharing with customers, experts, or reference sources.

The increasing occurrence of several kind of diseases are a threat for animals. Numerous type of cancer has been taking the lives of dogs in their very early age. Therefore, to provide a best and lifesaving treatment via deploying advanced devices is utmost important. Numerous advancements have been made in the veterinary field, particularly in the area of clinical diagnosis. Since big data and IoMT have been incorporated, clinical diagnosis of animals is being performed without any difficulty. Today's veterinary imaging is more accurate and precise, and it greatly aids in providing proper care in emergency situations as well. In this way, increasing advancement in veterinary science is fueling up the global veterinary imaging market growth.

However, deficit of skilled veterinarians, extreme price of veterinary imaging systems, and deficit of sentience associated with animal healthcare in emerging countries are expected to operate as key restraint to the growth of global veterinary imaging market over the forecast period.

This report also provides the existing competitive scenario of some of the key players of the

global veterinary imaging market which includes company profiling of Shenzhen Mindray Bio-Medical Electronics Co., Ltd., Siemens Aktiengesellschaft, Konica Minolta, Inc., IDEXX Laboratories, Inc., Heska Corporation, Carestream Health, Inc., IMV imaging (UK) Ltd, Hallmarq Veterinary Imaging Ltd, Universal Medical Systems, Inc., MinXray, Inc., and others. The profiling enfoldes key information of the companies which encompasses business overview, products and services, key financials and recent news and developments. On the whole, the report depicts detailed overview of the global veterinary imaging market that will help industry consultants, equipment manufacturers, existing players searching for expansion opportunities, new players searching possibilities and other stakeholders to align their market centric strategies according to the ongoing and expected trends in the future.
