Escalating the need for new methods of treating burn injuries in order to minimize the anxiety and pain in children will steer the growth of the burn injury treatment industry over the forecast period. The enlarged scope of the business is attributed to the huge demand for artificial skin substitutes such as biosynthetic skin substitutes for wound care in burn injuries.

Wound Care Dressings Segment To Accrue Major Gains Over 2020-2026

The segmental growth during the 2020-2026 period is owing to a surge in the awareness levels pertaining to treatment compliance and the high focus of manufacturers on introducing new methods of treating burn injuries.

## Traditional Dressings To Dominate The Treatment Type Segment By 2026

The massive use of traditional dressing techniques along with homemade remedies or herbal treatments witnessed across various households in both rural and urban regions will proliferate the growth of the segment during the forecast timeframe.

## North American market to be the major regional revenue pocket by 2026

The regional market growth over the forecast timespan is subject to the huge utilization of new products for treating burns and favorable compensation policies pertaining to burn treatment in countries like the U.S. and Canada.

The key players impacting the business are Integra LifeSciences Corporation, Essity Aktiebolag, ConvaTec, Inc., Cardinal Health, B. Braun Melsungen AG, Mölnlycke Health Care AB, 3M Healthcare, Smith & Nephew plc, and Coloplast Group.
