

Opkey publishes first-of-its-kind State of ERP Testing Report

Opkey commissions independent study to highlight key trends in the ERP space, and explains how these trends are impacting testing teams

DUBLIN, CA, USA, October 11, 2022 /EINPresswire.com/ -- [Opkey](#), an industry-leader in packaged application testing, released their inaugural State of ERP Testing 2022 report. The report is based on 3rd-party industry data and a survey conducted of over 300

Fortune 2000 C-Suite executives and VPs across a variety of industries and geographies.

“

We're really excited to release this report to the public.”

Pankaj Goel, Opkey's CEO and Founder

organizations are responding to these challenges by outsourcing testing to service providers and System Integrators, Opkey found that most organizations are dissatisfied with their current testing programs. Specifically, less than 10% are “extremely satisfied” with their level of test coverage. As a result, companies are now employing risk-based, continuous, and shift-left testing strategies, in addition to a greater focus on end-to-end

testing and test documentation.

“We're really excited to release this report to the public,” [Pankaj Goel](#), Opkey's CEO and Founder said. “It solidifies our belief that intelligent test automation platforms, like Opkey's, are critical to solving the ERP testing challenges that actual business leaders are facing today.”

Methodology

Opkey surveyed over 300 C-Suite executives and VPs to learn about their ERP testing programs. Conducted from May-August 2022, the survey included companies ranging in size from 1,500

employees to over 1 million employees. The goal was to better understand the challenges these organizations face with regards to their ERP testing.
