

Asherman's syndrome Market By Diagnosis, Application and is expected to reach USD 386.95 million by 2029

Global Asherman's Syndrome Market – Industry Trends and Forecast to 2029

PUNE, MAHARASHTRA, INDIA, October 10, 2022 /EINPresswire.com/ --

Asherman's syndrome Market study by "Data Bridge Market Research"

provides details about the market dynamics affecting the Healthcare Business Intelligence market, Market scope, Market segmentation, and overlays shadow upon the leading market players highlighting the favourable competitive landscape and trends prevailing over the years.

The leading Asherman's syndrome Market business research report takes into consideration several industry verticals such as company profile, contact details of manufacturer, product specifications, geographical scope, production value, market structures, recent developments, revenue analysis, market shares and possible sales volume of the company. The estimations of CAGR values are quite essential which helps businesses decide upon an investment value over the time period. The market insights and analysis about HEALTHCARE industry, performed in this market research report are based upon SWOT analysis on which businesses can depend confidently. Thus, Asherman's syndrome Market report aids to concentrate on the more important aspects of the market.

The universal Asherman's syndrome Market report makes business well acquainted with insightful knowledge of the global, regional and local market statistics. It has most-detailed market segmentation, systematic analysis of major market players, trends in consumer and supply chain dynamics, and insights about new geographical markets. While preparing this market research report, customer satisfaction has been kept on the utmost priority which makes clients rely on us confidently. The winning Asherman's syndrome Market business report has been formed by using information from trustworthy sources such as journals, websites, and annual reports of the companies, white papers, and mergers.

Data Bridge Market Research analyses that the Asherman's syndrome market was valued at USD 232.06 million in 2021 and is expected to reach USD 386.95 million by 2029, registering a CAGR of 6.60% during the forecast period of 2022 to 2029. In addition to the market insights such as market value, growth rate, market segments, geographical coverage, market players, and market scenario, the market report curated by the Data Bridge Market Research team also includes in-depth expert analysis, patient epidemiology, pipeline analysis, pricing analysis, and regulatory framework.

As per the International Asherman's Association, dilatation and curettage (D and C) procedures cause almost 90% of all instances of Asherman syndrome. Following an incomplete miscarriage, a retained placenta after birth, or an elective abortion, a D and C is usually performed. Asherman's Syndrome (AS) is an acquired disorder characterized by intrauterine adhesions (IUA), which produce symptoms such as irregular menstruation, pelvic pain, infertility, recurrent miscarriage, aberrant placentation, and psychological anguish. AS is traditionally thought to be an iatrogenic condition caused by trauma to the pregnant uterus. Different conditions can cause endometrium deterioration, altering the endometrial stem cell niche and resulting in IUAs.

Market Definition

Asherman's syndrome is a rare, acquired disorder in which scar tissue develops in the uterus or cervix. The uterine walls thicken as a result of the scar tissue, reducing the size of the uterus and, in severe cases, fusing the walls together. The adhesions or scar tissue are cut and removed during surgery. Hysteroscopy is frequently used to accomplish this. Small devices and a camera are inserted via the cervix into the uterus. Asherman's syndrome is also termed as intrauterine adhesions (IUA).

Drivers

Rise in the number of cases of Asherman's syndrome

The surging number of cases of Asherman's syndrome is a major factor driving the market's growth rate during the forecast period of 2022-2029. Asherman syndrome is a rather uncommon disorder. It mostly affects women who have had many dilation and curettage (D and C) surgeries. Asherman syndrome can also be caused by a severe pelvic infection that is unrelated to surgery. Adhesions in the uterine cavity can also develop following tuberculosis or schistosomiasis infection. In the United States, these infections are uncommon. Even fewer women experience uterine problems as a result of these infections.

Increasing investment for healthcare infrastructure

Another significant factor influencing the growth rate of Asherman's syndrome market is the rising healthcare expenditure which helps in improving its infrastructure. Also, various government organizations aim to improve the healthcare infrastructure by increasing funding and this will further influence the market dynamics.

Growing incidences of endometriosis

The rising incidences of endometriosis is estimated to enhance the market's growth rate. Asherman's syndrome is caused by endometriosis, a common inflammatory disease. It's caused by a uterine tissue (endometrium) build-up that can't be shed before menstruation. Lower back or thigh pain, as well as severe pain throughout the menstrual cycle, are possible symptoms.

Furthermore, rising government initiatives to spread awareness and sedentary lifestyle of people will result in the expansion of Asherman's syndrome market. Along with this, favourable reimbursement policies and growing use of radiation treatment will enhance the growth rate of the market.

Opportunities

Increase in the number of research and development activities

Moreover, the market's growth is fueled by an increase in the number of research and development activities. This will provide beneficial opportunities for the Asherman's syndrome market growth.

Moreover, the market's growth is fueled by rising technological advancement in diagnostic methods and emerging new markets. These factors will provide beneficial opportunities for the Asherman's syndrome market growth.

Restraints/Challenges

On the other hand, high cost associated with the treatment as well as diagnosis will obstruct the growth rate of market. The lack of healthcare infrastructure in developing economies and dearth of skilled professionals will challenge the Asherman's syndrome market. Additionally, lack of awareness among people and unfavourable healthcare policies will act as restraint and further impede the growth rate of market during the forecast period of 2022-2029.

This Asherman's syndrome market report provides details of new recent developments, trade regulations, import-export analysis, production analysis, value chain optimization, market share, impact of domestic and localized market players, analyses opportunities in terms of emerging

revenue pockets, changes in market regulations, strategic market growth analysis, market size, category market growths, application niches and dominance, product approvals, product launches, geographic expansions, technological innovations in the market. To gain more info on the Asherman's syndrome market contact Data Bridge Market Research for an Analyst Brief, our team will help you take an informed market decision to achieve market growth.

Patient Epidemiology Analysis

Women who are not attempting to conceive may not identify or be concerned about the signs of Asherman's syndrome. Hypomenorrhea may be seen in these women. Following the initial hysteroscopic excision of leiomyoma, Asherman's Syndrome can develop in 31% of women, and up to 46% after the second hysteroscopic resection. It can happen to up to 13% of women who have their pregnancy terminated in the first trimester, and 30% of women who have a dilation and curettage (D & C) following a late spontaneous abortion.

Asherman's syndrome market also provides you with detailed market analysis for patient analysis, prognosis and cures. Prevalence, incidence, mortality, adherence rates are some of the data variables that are available in the report. Direct or indirect impact analyses of epidemiology to market growth are analysed to create a more robust and cohort multivariate statistical model for forecasting the market in the growth period.
