The Steinberg Law Group has decades of experience in handling mesothelioma and other asbestos-related cases. With offices in New York, California and Texas, the Steinberg Law Group has a national footprint that helps win the best possible financial compensation for clients. www.mesotheliomaoptions.com/contact

Typically, asbestos exposure will have occurred sometime between the 1950s and the 1980s. Some of the most prevalent professions that encountered large quantities of asbestos include power plant workers, maritime workers, industrial workers, plumbers, pipefitters, electricians, mechanics, machinists, miners, railroad workers and construction workers, to name a few. Since the latency period for mesothelioma patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2022 were exposed decades ago.

www.mesotheliomaoptions.com/contact

Virginia contains vast natural deposits of asbestos in the Appalachian Mountains. Many Virginians have been exposed to asbestos in industries and jobsites such as mining, milling, energy, chemicals and shipbuilding. The highest concentration of mesothelioma and asbestos related lung cancer occurs in eastern Virginia as well as along the coastline.
