The search and rescue (SAR) equipment market consists of the sale of search and rescue equipment products by entities (organizations, sole traders, and partnerships) that are used to locate trapped people during search and rescue operations for those hurt in accidents, fires, and other urgent circumstances.

Global Search And Rescue (SAR) Equipment Market Trends

As per the search and rescue (SAR) equipment market forecast, technological advancements have emerged as a key trend gaining popularity. New designs and technology are changing the way in which search and rescue (SAR) missions are being conducted. Several improvements have been made in terms of searchlights, helmet-mounted displays, cameras, spin prevention technology, wireless crew communications, and equipment in order to find missing people more safely and quickly. For instance, in October 2020, Axnes, a Norway-based manufacturer of mission-critical wireless intercom systems optimized for SAR teams, operating in the search and rescue equipment market, introduced Polycon Next Generation (PNG) wireless ICS extension,
