The key highlights of the report include:

Market Overview (2017-2027)

Forecast CAGR (2022-2027): 8%

The rising number of patients, increasing elderly population, and growth in healthcare expenditure are propelling the market for bed monitoring systems. Furthermore, the growing

number of nuclear families has also enabled parents to use baby monitoring systems. Also, the increasing concern among people for monitoring their sleep patterns would drive the market for sleep monitoring systems.

Considering the end-use of these systems, homecare settings would likely grow at the fastest pace, driven by increasing disposable income and rising awareness about maintenance of health among people. The growing adoption of monitoring devices around the globe would further fuel the market in the coming years.

Industry Definition and Major Segments

The baby monitoring system is used by parents/guardians to keep an eye on their children. A baby monitor is a radio system that is used to remotely listen to the sounds made by a baby. On the other hand, a bed monitoring system helps in monitoring of daily activity patterns of patients/persons on the bed.
