Market Trends

Growing adoption of eHealth software and services is augmenting growth of the market. For instance, in February 2020, KareXpert Technologies, a digital healthcare platform provider, implemented RIS/PACS, Telemedicine, HIMs, EMR/EHR, and other services in the state of Uttarakhand, India, under a 5-year MoU with Nainital district administration.

Moreover, introduction of apps that integrate with RIS platforms and electronic health record is again projected to boost adoption of eHealth software and services. For instance, in April 2020, MedInformatix, a health IT company, launched Wait in Car, a new mobile-friendly application that allows patients to wait in the safety of their automobiles for assigned medical appointments. The app integrates with RIS platforms and electronic health record (EHR) to provide the service.

Key Benefits of the report:

This study presents the analytical description of the global eHealth Software and Services industry along with the current trends and future estimations to determine the imminent investment pockets.

The report presents information related to key drivers, restraints, and opportunities along with detailed analysis of the global eHealth Software and Services market share.

The current market is quantitatively analyzed from 2020 to 2027 to highlight the global eHealth Software and Services market growth scenario.

Porter's five forces analysis illustrates the potency of buyers & sellers in the market.

The report provides a detailed global eHealth Software and Services market analysis based on competitive intensity and how the competition will take shape in the coming years.
