Impact of COVID-19:

COVID-19 pandemic led to strict lockdowns in many nations worldwide, affecting the financial market in many sectors. One of the sectors to be majorly impacted by this pandemic is the healthcare sector. Professionals from the healthcare sector are facing shortages of ventilation

equipment, patient monitoring devices for intensive or personal care.

In spite of these lockdowns, telerehabilitation has been of great help in providing virtual therapy for patients. For instance, JMIRx Med published a study in January 2022, stating that during the pandemic around 84% of the physiotherapists and occupational therapists have been using video-based consultations for treating patients. This study exhibited the positive impacted of COVID-19 on the U.S. physical therapy virtual and telerehabilitation services market.

The following Key Players are Mentioned in this Document:

- MTI America
- VPT (Virtual Physical Therapists)
- Conversa Health
- MindStreet, Inc.

Driver:

Rise in the number of cardiovascular disorders is anticipated to fuel the growth of the U.S. physical therapy virtual and telerehabilitation services market during the forecast period. For instance, in 2019, the American College of Cardiology Foundation stated that around 1.05 million people in the United States of America are suffering from coronary diseases. Furthermore, in 2020, the CDC (Centers for Disease Control and Prevention) reported that every year around 805,000 individuals in the U.S. have a heart attack.

However, the rise in development of novel systems required for providing rehabilitation services is estimated to boost the growth of the U.S. Physical Therapy Virtual and Telerehabilitation Services Market during the forecast period. For instance, a digital health company, PT Genie developed a wearable device in 2019, for maintain remote connection between patients and their physical therapist. The wearable device provides real-time feedback and also helps in maintaining a connection between the patient and therapist in order to help the patient recover and follow the exercise regime.

Key Benefits of the report:

This study presents the analytical description of the global U.S. Physical Therapy Virtual and Telerehabilitation Services industry along with the current trends and future estimations to determine the imminent investment pockets.

The report presents information related to key drivers, restraints, and opportunities along with detailed analysis of the global U.S. Physical Therapy Virtual and Telerehabilitation Services market share.

The current market is quantitatively analyzed from 2021 to 2028 to highlight the global U.S. Physical Therapy Virtual and Telerehabilitation Services market growth scenario.

Porter's five forces analysis illustrates the potency of buyers & sellers in the market.

The report provides a detailed global U.S. Physical Therapy Virtual and Telerehabilitation Services market analysis based on competitive intensity and how the competition will take shape in the coming years.
