Data Bridge Market Research analyses that the epilepsy treatment market which was USD 1330.53 million in 2021, would rocket up to USD 2152.88 million by 2029, and is expected to undergo a CAGR of 6.20% during the forecast period 2022 to 2029. In addition to the market insights such as market value, growth rate, market segments, geographical coverage, market players, and market scenario, the market report curated by the Data Bridge Market Research team also includes in-depth expert analysis, patient epidemiology, pipeline analysis, pricing analysis, and regulatory framework.

Market Definition

The term "epilepsy" describes a long-term neurological condition that results in frequent, unjustified seizures. A person with epilepsy frequently experiences seizures that have no known cause. The actual origins of these seizures are yet unknown, but they may be brought by some stressful event or a prior brain injury. The disorder often affects both adults and children, however the danger of infection is higher in the elderly population.

Epilepsy Treatment Market Dynamics

Drivers

Rise in injuries

The key drivers driving the epilepsy treatment market are the rise in accidents and brain injuries and the high rates of post-traumatic epilepsy (PTE) and post-traumatic seizure (PTS) occurrence in patients with brain injuries. The expansion of the epilepsy treatment market is accelerated by the rise in government funding for improving and developing effective medications and treatments for seizures, as well as the rise in R&D activities to provide cutting-edge healthcare facilities.

Technological advancements

The market for epilepsy treatments is also impacted by groups working together to provide physicians and the public with better treatment options and awareness training initiatives.

Rise in the geriatric population

The ageing population, rising epilepsy rates, increased public awareness of treatment alternatives, and declining treatment costs all favor the market. The development of new medications and therapeutic options and the approval and introduction of new products provide

lucrative opportunities to the players in the epilepsy treatment market during the forecast period of 2022 to 2029. market for treating epilepsy.

Opportunities

Increase in the number of research and development activities

The initiatives by the government and advancement in drugs and treatments across the globe are escalating the growth of epilepsy treatment market.

Recent Development

In August 2021, In an agreement signed between Yuyu Pharma and Novartis Korea, Yuyu obtained the exclusive distribution rights for three prescription drugs, including Tegretol, a medication containing the drug carbamazepine used to treat diseases including epilepsy.

In February 2021, A leading provider of remote diagnostics and monitoring, BioTelemetry, Inc., was purchased by Koninklijke Philips N.V.
