

Intermittent Pneumatic Compression (IPC) Devices Market is growing at a CAGR of 8.70% during the forecast period to 2029

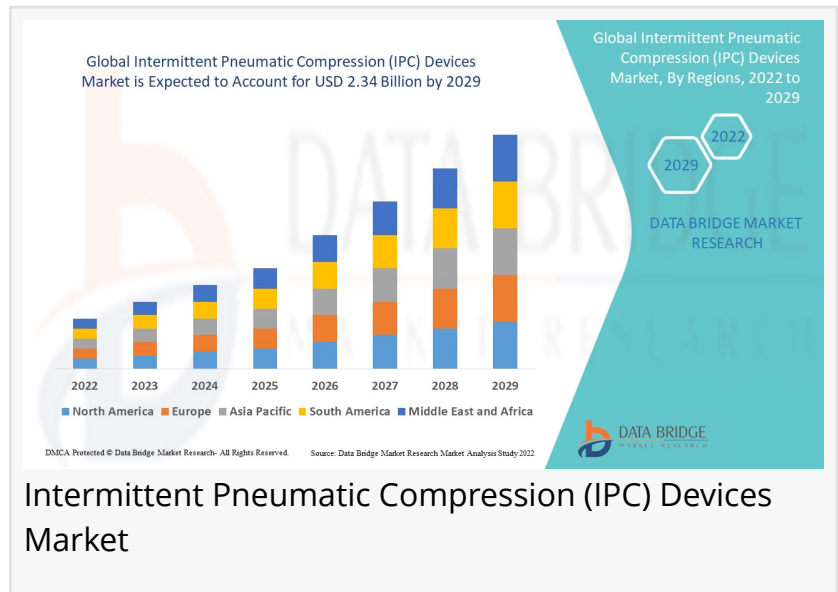

The market was valued at USD 1.20 billion in 2021, and it would grow up to USD 2.34 billion by 2029.

PUNE, MAHARASHTRA, INDIA, October 11, 2022 /EINPresswire.com/ --

[Intermittent Pneumatic Compression \(IPC\) Devices Market](#) Research Report 2022 spans over 200+ pages and offers valuable insights about market size, market share, revenue growth, sales network and distribution channel, and other key factors such as drivers, constraints, technological

advancements, competitive Landscape, sales analysis, product developments and Intermittent Pneumatic Compression (IPC) Devices Market players. The comprehensive market research conducted in Intermittent Pneumatic Compression (IPC) Devices market document puts a light on the challenges, market structures, opportunities, driving forces, and competitive landscape for the business. All the data, statistics, facts and figures included in this business report are very vital to the businesses when it comes to define the strategies about the production, marketing, sales, promotion, advertising and distribution of the products and services. This market research report is one of the best and wide-ranging market reports which provide market insights by considering number of factors. With the consistent Intermittent Pneumatic Compression (IPC) Devices market report, it becomes easy to uncover the best market opportunities and foster resourceful information for the business to thrive in the market.

Data Bridge Market Research analyses a growth rate in the global intermittent pneumatic compression (IPC) devices market in the forecast period 2022-2029. The expected CAGR of global intermittent pneumatic compression (IPC) devices market is tend to be around 8.70% in the mentioned forecast period. The market was valued at USD 1.20 billion in 2021, and it would grow up to USD 2.34 billion by 2029.

Key Companies in the Market Include

Zimmer Biomet (U.S.), Breg (U.S.), DJO, LLC (U.S.), DevonMedicalProducts.com (U.S.), Cardinal Health (U.S.), Mego Afek AC LTD (Israel), Bio Compression Systems (U.S.), ThermoTek USA (U.S.), Medline Industries, LP (U.S.), Tactile Medical (U.S.)

Intermittent Pneumatic Compression (IPC) Devices Market Segmentation:

By Type (Deep Vein Thrombosis (DVT), Pulmonary Embolism (PE))

By Application (Home Use, Hospital)

Market Overview

Intermittent pneumatic compression (IPC) devices are mechanical compression devices that help to prevent pulmonary embolism (PE) and deep vein thrombosis (DVT). And they are used to treat chronic venous insufficiency. They also help prevent DVT and PE. And they are used to treat chronic venous insufficiency. These intermittent pneumatic compression (IPC) devices have multiple applications in the healthcare industry today and is thus increasing the market growth rapidly.

Global Intermittent Pneumatic Compression (IPC) Devices Market Dynamics

Drivers

Surge in Online Shopping

Online shopping is convenient, and most online stores offer products at much lower prices than physical stores. Online entrepreneurs understand this and generally reduce net sales to attract more customers. Most physical stores have a limited range of products. E-commerce is very popular among shoppers and highly profitable sales channels due to the increasing benefits of online shopping.

Increasing Vascular Diseases

Over the years, the rate of diagnosis of vascular diseases such as deep vein thrombosis and pulmonary embolism has increased significantly. This slows blood flow, causes red blood cells to aggregate and form blood clots. Lymphedema is the main cause of its prevalence, and lymph accumulation causes soft tissue swelling. Intermittent air compression (IPC) devices help recover from such vascular disease.

Opportunities

Technological Advancements

Significant advances in textiles and nanotechnology and growth across the sector are driven by growing demand for mainstream fashion features. Manufacturers of pneumatic compression devices are focusing on the portability of the device. For instance, DJO Global, Inc. has launched an easy-to-use and easy-to-repair wearable venapro device to prevent post-operative DVT. Another device is the portable venowave device used on the legs to treat postoperative DVT.

Ease of Use and Portability

Intermittent air compression devices are made for home use. They are portable enough to be carried anywhere in the house, in the car, and outdoors. Such portable devices are lightweight and do not have tubes or hoses attached for ease of use. These devices enable non-invasive and continuous monitoring of medical parameters. Provides real-time data / updates to healthcare professionals through connections.

Key Indicators Analysed

Market Players & Competitor Analysis: The report covers the key players of the industry including Company Profile, Product Specifications, Production Capacity/Sales, Revenue, Price and Gross Margin & Sales by Product Types.

Global and Regional Market Analysis: The report includes Global & Regional market status and outlook 2022-2029. Market segmentation opportunities and disruptive technologies, company overview, revenue shares, strategic overview of market supply and demand. The industry analysis provides data & insights on historical volume sales of Intermittent Pneumatic Compression (IPC) Devices industry.

Market Analysis by Product Type: The report covers majority Product Types in the Radiation Therapy Devices Industry, including its product specifications by each key player, volume, sales by Volume and Value (M USD).

Market Analysis by Application Type: Based on the Intermittent Pneumatic Compression (IPC) Devices Industry and its applications, the market is further sub-segmented into several major Application of its industry. It provides you with the market size, CAGR & forecast by each industry applications.

Company & Brand Share Analysis: Company and brand share analysis on Intermittent Pneumatic Compression (IPC) Devices Market reveals how much market dynamics and trends is captured by major players

Market Trends: Intermittent Pneumatic Compression (IPC) Devices Market key trends which include Increased Competition and Continuous Innovations.

Opportunities and Drivers: Identifying the Growing Demands and New Technology.

Market Consumption by demographics: The Market shares and strategies study provides consumption by demographics analysis so market players can design their product and marketing strategies on the basis of high-value consumers.

Porters Five Force Analysis: The report will provide with the state of competition in industry depending on five basic forces: threat of new entrants, bargaining power of suppliers, bargaining power of buyers, threat of substitute products or services, and existing industry rivalry.

Intermittent Pneumatic Compression (IPC) Devices Market Country Level Analysis

The report is mainly segmented into several key regions, with sales, revenue, market share and growth rate in these regions, covering:

U.S., Canada and Mexico in North America, Germany, France, U.K.

Netherlands, Switzerland, Belgium, Russia, Italy, Spain, Turkey, Rest of Europe in Europe

China, Japan, India, South Korea, Singapore, Malaysia, Australia, Thailand

Indonesia, Philippines, Rest of Asia-Pacific (APAC) in the Asia-Pacific (APAC), Saudi Arabia, U.A.E, South Africa, Egypt, Israel, Rest of Middle East and Africa (MEA)

The Report Includes

The analyzing tools like SWOT analysis and Porters Five Forces tool are utilized to get a clear picture of the Global Intermittent Pneumatic Compression (IPC) Devices Market.

It develops and modifies business strategies by employing the growth analysis of the changing competitive dynamics of the industry.

The research methods and tools used to analyze the studies are primary and secondary

research.

It encourages the global market decision by an in-depth 8-year forecast along with predictions of market size.

Futuristic outlook on factors driving and restraining the growth of the market.

Comprehensive analysis of the key product segments and their growth estimation for easy understanding.

Provides a competitive edge to the companies operating in the Intermittent Pneumatic Compression (IPC) Devices market trends.

Strategic recommendations to the established companies as well as new entrants in the industry.

In-depth analysis of Intermittent Pneumatic Compression (IPC) Devices market segments and complete insights of the market to assist in formulating investment strategies.

About Data Bridge Market Research:

An absolute way to forecast what future holds is to comprehend the trend today!

Data Bridge Market Research set forth itself as an unconventional and neoteric Market research and consulting firm with unparalleled level of resilience and integrated approaches. We are determined to unearth the best market opportunities and foster efficient information for your business to thrive in the market. Data Bridge endeavours to provide appropriate solutions to the complex business challenges and initiates an effortless decision-making process. Data bridge is an aftermath of sheer wisdom and experience which was formulated and framed in the year 2015 in Pune.

Data Bridge Market Research has over 500 analysts working in different industries. We have catered more than 40% of the fortune 500 companies globally and have a network of more than 5000+ clientele around the globe. Data Bridge adepts in creating satisfied clients who reckon upon our services and rely on our hard work with certitude. We are content with our glorious 99.9 % client satisfying rate.
