

E- Prescribing Market to Accrue 21.4% of CAGR During 2026

An increasing number of medical errors in chemotherapy has led to the adoption of the technology in hospitals specifically for oncology.

PORTLAND, PORTLAND, OR, UNITED STATE, October 12, 2022

/EINPresswire.com/ -- Rise in the development of customer-centric strategies to improve the affordability, access, and quality of health care records, the adoption and effective use of interoperable electronic health record (EHR) systems and other health information technologies (HIT), including those for electronic prescribing, have gained high traction from the recent past.

E-Prescribing Industry

Technological advances, especially in application interfaces for handheld devices and wireless network technologies have encouraged physicians to adopt new prescribing approaches. This has resulted in a rise in the adoption of e-prescribing systems and applications among clinical firms.

The rise in the adoption of e-prescribing in the healthcare industry across the globe is a major factor expected to drive the e-prescribing market growth. Moreover, the use of electronic prescribing has allowed clinicians to accurately and efficiently communicate prescribed patient drug therapy to dispensing pharmacies, hence minimizing or eliminating common sources of medication errors. Which in turn impacts the growth of the e-prescribing market positively during the forecast period.

By component, the solutions segment dominated the overall e-prescribing market in 2018 and is further expected to endure traction for e-prescribing among organizations during the forecast period. The rise in the integration of e-prescribing among EHR and HIT systems is a major factor that drives the growth of the segment in the global market.

Moreover, the services segment has witnessed significant growth in the electronic prescribing market, in terms of CAGR during the forecast period. This is attributed to the e-prescribing services suite that includes installation, consulting, maintenance, and support services.
