Based on type, the global idiopathic pulmonary fibrosis market is segmented into pirfenidone and nintedanib. Pirfenidone is expected to dominate the market during the analysis period, as the drug helps reduce scarring and thereby preserve lung function. Nintedanib is expected to register a CAGR of 6.6% during the forecast period.

Based on distribution channel, the retail pharmacy segment holds the largest share of the global idiopathic pulmonary fibrosis market in 2020. This segment is expected to exhibit high growth rate due to rapid growth in idiopathic pulmonary fibrosis. Increasing population rates,

technological advancements, and lifestyle changes worldwide.

North America accounted for more than 41.23% of the global idiopathic pulmonary fibrosis market share in 2020 and is expected to remain dominant throughout the forecast period. The increase in demand for IPF drugs, increase in the number of trained medical professionals and supportive reimbursement policies in the health care system have contributed to this.
