

Gastrointestinal Drugs Global Market Estimated To Grow At 9% Rate

*The Business Research Company's
Gastrointestinal Drugs Global Market
Report 2022: Market Size, Trends And
Forecast To 2026*

LONDON, GREATER LONDON, UK,
October 13, 2022 /EINPresswire.com/ --

As per The Business Research
Company's "Gastrointestinal Drugs
Global Market Report 2022", the

gastrointestinal drugs market is expected to grow from \$71.85 billion in 2021 to \$75.63 billion in 2022 at a compound annual growth rate (CAGR) of 5.30%. The change in the gastrointestinal drugs market growth trend is mainly due to the companies stabilizing their output after catering to the demand that grew exponentially during the COVID-19 pandemic in 2020. The gastrointestinal drugs market is expected to reach \$105.51 billion in 2026 at a CAGR of 8.70%. The increase in patient pool due to rising geriatric population globally, will contribute significantly to the growth of the market during the forecast period.

Key Trends In The Gastrointestinal Drugs Market

Major companies in the gastrointestinal drug industry are investing in making oral capsules of macromolecular drugs for gastrointestinal diseases for making the drug more effective. Macromolecular drugs, such as peptides, proteins, and antibodies, form a new class of drugs which can treat diseases of the gastrointestinal tract, such as inflammatory bowel disease. These macromolecular drugs are usually injected and only a fraction of the administered dose reaches the disease sites in the gastrointestinal tract. Thus, major companies such as Eli Lilly have been increasingly investing in making oral capsules for macromolecular drugs. The company invested \$5 million to enter into a collaboration with Entrega to study the oral delivery of complex molecules, such as peptides to combat gastrointestinal diseases.

Overview Of The Gastrointestinal Drugs Market

The gastrointestinal drugs market consists of sales of gastrointestinal drugs by entities

(organizations, sole traders and partnerships) that produce gastrointestinal drugs to treat gastrointestinal diseases such as ulcerative colitis, diverticular disease, perianal infections, anal fissures, hemorrhoids, constipation, and irritable bowel syndrome. The key gastrointestinal diseases drug categories include Anti-peptic agents (antacids, antagonists, Proton Pump Inhibitors, Sucralfate, and Misoprostol), antiemetics, adsorbents, anticholinergics, opiates, intestinal flora modifiers, emollient/surfactants, hyperosmotic, saline, and simulant/irritant.
