

Colorectal Cancer Screening Market Growing at CAGR of 7.5% between 2022 and 2028 | Polymedco, Eiken, Sysmex Corp

SEATTLE, UNITED STATES, UNITED STATES, October 12, 2022

/EINPresswire.com/ -- Colorectal cancer, often known as colon cancer, is a type of cancer that starts in the large intestine (colon). The colon is the last stop on the digestive system. A polyp, or growth inside the colon or rectum, is typically the first sign of malignancy. Polyps should be detected and removed to avoid colorectal cancer. Rectal cancer and colon cancer are frequently grouped due to their similarities. Cancer arises when bodily cells begin to proliferate uncontrollably. Colonoscopy is a procedure used to look for polyps or cancer in the colon and rectum. A colonoscope—a flexible, lighted tube with a lens for viewing and a tool for removing tissue—is used during this test to inspect the rectum and the entire colon.

The global [Colorectal Cancer Screening market](#) generated \$12,866.16 billion in 2021 and is projected to reach \$21,135.40 Mn By 2028, with a CAGR of 7.5% over the forecast period (2022 – 2028).

Market Drivers

Over the projected period, it is anticipated that the worldwide colorectal cancer screening market would develop more rapidly due to the rising incidence of the disease. Colorectal cancer ranks third in the United States for cancer-related fatalities among both men and women. The American Cancer Society projects that there will be 52,580 cancer fatalities and around 106,180 newly diagnosed cancer cases in the United States in 2022. As a result, colorectal cancer

screening is becoming more and more popular in this area.

Over the course of the projected period, rising demand for colorectal cancer screening tests is anticipated to fuel market expansion. For instance, Shield, the company's first blood-based test for the identification of early-stage colorectal cancer, was made available, according to a May 2022 announcement from Guardant Health, Inc. Adults age 45 and older who have not followed recommended screening recommendations, have no symptoms, and are at average risk for colorectal cancer should have the test.

The following Key Players are Mentioned in this Document: Polymedco Inc., Eiken Chemical Co. Ltd., Sysmex Corporation, Siemens Healthineers AG, Quidel Corporation, Novigenix SA, Hemosure Inc., Exact Sciences Corp., Epigenomics Inc., Olympus Corporation, and Clinical Genomics Technologies Pty Ltd., among others

Report Coverage:

- Provides a comprehensive understanding of the Colorectal Cancer Screening market with the help of informed market outlook, opportunities, challenges, trends, size and growth, competitive analysis, major competitors, and Porter's five analysis
- Identifies the key drivers of growth and challenges of the key industry players. Also, assesses the future impact of the propellants and restraints on the market
- Uncovers potential demands in the market
- Porter analysis identifies competitive forces within the market
- Provides information on the historical and current market size and the future potential of the market
- Provides sizes of key regional markets using yardsticks of processes, segments, products, end-user, technology, etc (as applicable)
- Highlights the competitive scenario of the market, major competitors, market share, benchmarking, investments, and merger acquisitions

Why Choose Colorectal Cancer Screening Market Report?

- Unbiased conclusions and market insights
- 24×7 customer service available to address client queries
- Highly efficient and experienced team of analysts striving to create top-quality reports
- Our reports have facilitated the growth of over 500 companies
- A systematic and methodical market research process
