

Gait Trainer Market Size worth USD 462.1 Million in 2028, [+Investment Feasibility Index] – Market.us | At A CAGR of 5.0%

Gait Trainer Market will grow at a rate of 5.0% over the next ten years and will reach USD 462.1 Million in 2028 from USD 283.7 Million in 2018.

NEW YORK CITY, NEW YORK, UNITED STATES, October 13, 2022

/EINPresswire.com/ -- According to Market.us (Prudour Research), the global market for [Gait Trainer Market](#) will grow at a rate of 5.0% over the next ten years and will reach USD 462.1 Million in 2028 from USD 283.7 Million in 2018.

Gait Trainer Market Size

Gait trainers are devices that support patients or people who are unable to walk on their own. This device allows an individual to walk safely, and efficiently. Gait trainers can be used to increase the walking ability of people with disabilities, such as children and adults. These devices offer unweighting support and postural alignment that allow patients to walk correctly and healthy.

Gait Trainer Market: Drivers

An increase in the number of disorders

Global growth in demand for gait trainers is due to an increasing incidence of injuries and disorders like strokes, Parkinson's disease and spinal injuries. Individuals with walking disabilities

are also affected by the increasing number of road accidents. This will further increase the market for gait trainers.

Rising geriatric population base

The muscles become more awakened as we age. This can negatively impact the strength of the spine and back, making it more difficult for older people to walk independently and alone. There is a large demand for gait trainers in the elderly population.

Government investments in healthcare infrastructure

Gait trainers will be in high demand due to the increase in federal funding. Profitable market growth opportunities will also be created by the growth and expansion of the healthcare industry, especially in developing countries.

The market for gait trainers is also positively affected by a rise in personal disposable income, increasing awareness about the many benefits of gait trainers, and increased investment in advanced technology.

Gait Trainer Market: Restraints

Market growth will be impeded by high costs associated with initial investment and maintenance, a lack of awareness in underdeveloped countries about the benefits, limited infrastructure facilities, and high expenses required for research and development activities. The market for gait trainers is expected to be challenged by its limited use in the 2022-2029 forecast period.

This report on the gait trainer market provides information about recent developments, trade regulations and production analysis. It also analyzes market share and impact of local market players. Our team can help you make informed market decisions to grow your market.
