

Medication-Assisted Treatment (MAT) Market By Service, Size, Share, Trends, Latest Innovations & Forecast 2029

Medication-Assisted Treatment (MAT) Market Industry Analysis and Forecast 2029

PUNE, MAHARASHTRA, INDIA, October 13, 2022 /EINPresswire.com/ -- The [Medication-Assisted Treatment \(MAT\) Market](#) research report delivers a comprehensive analysis of the market structure along with a forecast of the diverse segments and sub-segments of the market. The base year for calculation in the report is taken as

2020 and the historic year is 2019 which will tell how the market is going to perform in the forecast years by informing what the market definition, classifications, applications, and engagements are. The report gives helpful insights which assist while launching a new product. it is a professional and detailed report focusing on primary and secondary drivers, market share, leading segments, and geographical analysis.

Medication-assisted treatment (MAT), involves the use of medications, combined with counselling and behavioural therapies, to provide a complete patient approach for treating substance use disorders. MAT is primarily used to treat addiction to opioids such as heroin and prescription pain relievers. The aim of MAT is proper recovery, which includes improved patient survival, increased treatment retention, reduced illicit response, and grow in pregnancy outcomes among women.

The Food and Drug Administration (FDA) approved three drugs for clinical use which are buprenorphine, methadone, and naltrexone. Medication-assisted treatment (MAT) is applied to cure alcohol use disorder, opioid dependency medication, and opioid overdose prevention medication. Alcohol use disorder (AUD) is a medical condition characterized by an impaired ability to stop alcohol use despite adverse social, occupational, or health consequences. Acamprosate, disulfiram, and naltrexone are the most common medications used to treat alcohol use disorder (AUD). The opioid dependency medication, rise in addiction for opioids

among patients. Buprenorphine, methadone and naltrexone are used to treat opioid use disorders to short-acting opioids such as heroin, morphine, and codeine, as well as semi-synthetic opioids like oxycodone and hydrocodone. These MAT medications are safe for months, years, or even a lifetime. For opioid overdose prevention medication, naloxone is used to prevent opioid overdose by reversing the toxic effects of the overdose. According to the World Health Organization (WHO) and by Substance Abuse and Mental Health Services Administration (SAMHSA), naloxone is one of many medications considered essential to a functioning health care system.

Medication-Assisted (MAT) Treatment Market Regional Analysis/Insights

The global medication-assisted (MAT) treatment market is analysed, and market size insights and trends are provided by regions, product type, application, workflow, end user and distribution channel. As referenced above.

The countries covered in the medication-assisted (MAT) treatment market report are the U.S., Canada and Mexico, Germany, France, U.K., Italy, Spain, Russia, Turkey, Netherlands, Switzerland, Norway, Poland, Hungary, Lithuania, Austria, Ireland, and Rest of Europe., China, Japan, South Korea, India, Australia, Singapore, Thailand, Malaysia, Indonesia, Philippines, Vietnam and Rest of Asia-Pacific, Brazil, Argentina, Peru and Rest of South America. South Africa, Saudi Arabia, U.A.E, Egypt, Israel, Kuwait, and the Rest of Middle East and Africa.

North America is expected to dominate the market due to a rise in the incidence of substance use disorders, ongoing clinical trials, and pharmaceutical companies.

The country section of the report also provides individual market impacting factors and domestic regulation changes that impact the current and future market trends. Data points such as new sales, replacement sales, country demographics, disease epidemiology and import-export tariffs are some of the major pointers used to forecast the market scenario for individual countries. Also, the presence and availability of global brands and their challenges faced due to large or scarce competition from local and domestic brands and the impact of sales channels are considered while providing forecast analysis of the country data.

Competitive Landscape and Medication-Assisted (MAT) Treatment Market Share Analysis

The global medication-assisted (MAT) treatment market competitive landscape provides details by competitor. Details included are company overview, company financials, revenue generated, market potential, investment in research and development, new market initiatives, the Global presence, production sites and facilities, production capacities, company strengths and weaknesses, product launch, product width and breadth, application dominance. The above data

points provided are only related to the companies' focus related to the medication-assisted (MAT) treatment market.

Some of the major players operating in the medication-assisted (MAT) treatment market are Indivior PLC, Orexo US Inc. (a subsidiary of Orexo AB), Recovery Centers of America, Alkermes. Sun Pharmaceutical Industries Ltd., Purdue Pharma L.P., Taj Pharmaceuticals Limited, Lannett, Hikma Pharmaceuticals PLC, Pfizer Inc., Pinnacle Treatment Center, American Addiction Centers, Adamis Pharmaceuticals Corporation, Glenmark Pharmaceutical Inc. Viatris Inc., Mallinckrodt, Alvogen, Accord Healthcare, VistaPharm, Inc., Teva Pharmaceutical Industries Ltd. Dr. Reddy's Laboratories Ltd. Amneal Pharmaceuticals LLC. Titan Pharmaceuticals, Inc. among others.
