Some of the major players operating in the angiogenesis inhibitors market are F. Hoffmann-La Roche Ltd, Pfizer Inc., Exelixis, Inc, Novartis AG, Takeda Pharmaceutical Company Limited, Melinta Therapeutics LLC, Cipla Inc., Sun Pharmaceutical Industries Ltd., Bristol-Myers Squibb Company, Balaji Medical Services Private Limited, Eli Lilly and Company, Bayer AG, Sanofi and Merck & Co., among others.

Global Angiogenesis Inhibitors Market Definition

The formation of new blood vessels is known as angiogenesis. Anti-angiogenics, also referred as angiogenesis inhibitors, are substances that block the process of angiogenesis. These drugs are crucial in the treatment of certain cancers. Angiogenesis inhibitors are different from other

cancer-fighting drugs in that they stop the growth of blood vessels that support tumor growth rather than stopping tumor cells from growing.

Angiogenesis Inhibitors Market Dynamics

Drivers

Growing Cases of Cancer

The increasing burden of cancer such as breast cancer, prostate cancer and lung cancer globally will result in the expansion of the growth rate of the treatment market.

Moreover, the research and development investments generates novel therapies are also the growth determinants which bolster the growth of the market. Also, the availability of treatment options and robust pipeline that leads to potential drugs will further enhance the growth of angiogenesis inhibitors market.

Furthermore, advancement in medical technology and rise in the increasing adverse effects from chemotherapy are the cancer that will expand the angiogenesis inhibitors market. Other factors such as increase in the demand for effective treatment procedures will positively impact the angiogenesis inhibitors market's growth rate.

Opportunities

Moreover, the government initiatives to increase cancer awareness will boost new opportunities for the market's growth rate. Also, the developments in healthcare technology will escalate the growth rate angiogenesis inhibitors market in future.

Global Angiogenesis Inhibitors Market Scope

The angiogenesis inhibitors market is segmented on the basis of product, indication, drugs, route of administration, end-users and distribution channel. The growth amongst these segments will help you analyze meager growth segments in the industries and provide the users with a valuable market overview and market insights to help them make strategic decisions for identifying core market applications.

Product

VEGF Targeted Therapy

FGF Targeted Therapies

Oncogene Targeted Therapy

Matrix Degrading and Remodeling Targeted Therapy

Others

On the basis of product, angiogenesis inhibitors market is segmented into VEGF targeted

therapy, FGF targeted therapies, oncogene targeted therapy, matrix degrading and remodeling targeted therapy and others. VEGF targeted therapy segment is expected to grow at the fastest CAGR during the forecast period.

Indication

Glioblastoma
Colorectal Cancer
Others

On the basis of indication, angiogenesis inhibitors market is segmented into glioblastoma, colorectal cancer and others.

Route of Administration

Oral
Parenteral
Others

On the basis of route of administration, the angiogenesis inhibitors market is segmented into oral, parenteral and others.

End-Users

Hospitals
Specialty Clinics
Others

On the basis of end-users, the angiogenesis inhibitors market is segmented into hospitals, specialty clinics and others.

Distribution Channel

Hospital Pharmacy
Retail Pharmacy
Others

On the basis of distribution channel, the angiogenesis inhibitors market is segmented into hospital pharmacy, retail pharmacy and others.

Angiogenesis Inhibitors Market Regional Analysis/Insights

The angiogenesis inhibitors market is analyzed and market size insights and trends are provided by country, product, indication, drugs, route of administration, end-users and distribution channel as referenced above.

The countries covered in the angiogenesis inhibitors market report are U.S., Canada and Mexico in North America, Germany, France, U.K., Netherlands, Switzerland, Belgium, Russia, Italy, Spain,

Turkey, Rest of Europe in Europe, China, Japan, India, South Korea, Singapore, Malaysia, Australia, Thailand, Indonesia, Philippines, Rest of Asia-Pacific (APAC) in the Asia-Pacific (APAC), Saudi Arabia, U.A.E, South Africa, Egypt, Israel, Rest of Middle East and Africa (MEA) as a part of Middle East and Africa (MEA), Brazil, Argentina and Rest of South America as part of South America.

North America dominates the angiogenesis inhibitors market in terms of market share and market revenue and will continue to flourish its dominance during the forecast period. This is due to the growing incidence of cancer in the country, the presence of key market players, and the launch of new commodities influence market growth in this region. Asia-Pacific on the other hand is projected to exhibit the highest growth rate during the forecast period due to the factors such as the surging awareness about early diagnosis, growth in healthcare expenditure, high unmet clinical needs of patients as well as the effective treatment in emerging countries such as China and India in the region.
