The laparoscopy segment accounted for more than one-third of the total market share in 2017 and is expected to maintain its dominance during the forecast period. This is due to the increase in the obese population and the increased demand for minimally invasive bariatric surgery. However, the gastrointestinal endoscopy segment is expected to register the highest growth at a CAGR of 8.3% from 2018 to 2025, due to increasing health, increasing geriatrics population and adoption of minimally invasive procedures. . Examinations also include bronchoscopy, arthroscopy, urological endoscopy, neuroendoscopy, obstetrical/gynecological endoscopy, ENT endoscopy, etc.
