

The Growing Interest In Cloud-Based Solutions Accelerates The Hardware Support Services Market Growth

The Business Research Company's Hardware Support Services Market 2022 - Opportunities And Strategies – Global Forecast To 2030

LONDON, GREATER LONDON, UK,
October 25, 2022 /EINPresswire.com/ --

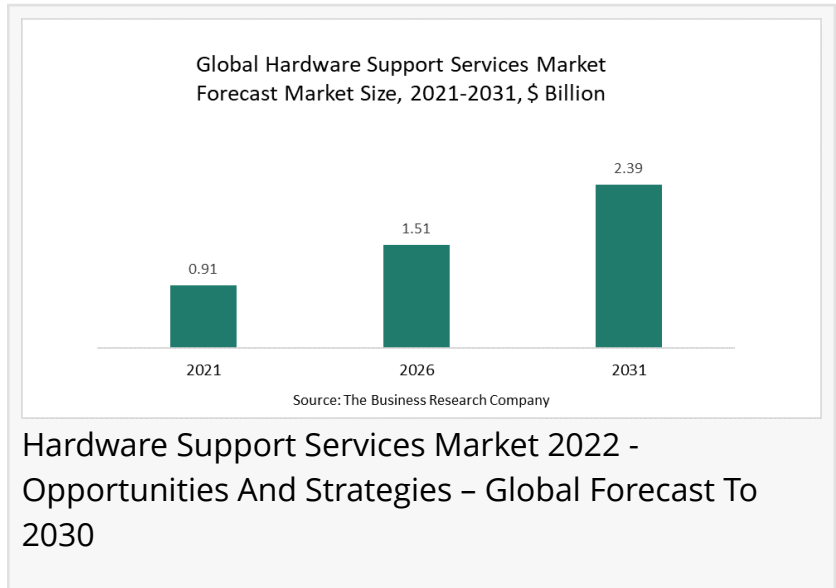

Rising demand for cloud-based solutions in developing economies such as India, China, Brazil, and Africa will drive the growth of the market. These countries and region require cost-effective solutions as they lack financial resources and are in early development.

Also, the companies in these countries and region can benefit from saving their IT expenditures by adopting cloud computing services. The ability to use on-demand, scalable cloud models to achieve cost efficiency and business continuity is providing the chance for organizations to rapidly accelerate their digital business transformation plans. For instance, in October 2021, Google LLC, a US-based technology company, announced the launch of Google Distributed Cloud, a portfolio of solutions consisting of hardware and software that extend infrastructure to the edge and into your data centers.

The cloud is enabling IT teams to move hardware out of the internal data center and reduce their day-to-day management burden. The end result is a situation in which fiscal plans are also changed, with many companies putting more funds into the cloud and less to the internal data center. As cloud computing services continue to grow, the demand for cloud data recovery solutions is gathering pace. Disaster recovery tools are particularly needed because the cloud stores data which is prone to cyber and malware attacks. For instance, Kroll Ontrack offers SharePoint and SQL server cloud data recovery solutions.
