The key highlights of the report include:

Market Overview (2017-2027)

- Historical Market Size (2021): 456.2 Million
- Forecast CAGR (2022-2027): 4.63%

For the last several years, the global market for dengue testing has been rapidly expanding. The increase in dengue incidence has increased the need for diagnostic kits. Furthermore, increased research and development initiatives to produce highly sensitive and specific dengue diagnostic kits are projected to fuel market expansion. Better healthcare infrastructure and increased

availability of diagnostic centres in emerging nations are likely to drive market expansion during the forecast period. Changes in climatic conditions, as well as a lack of cleanliness and effective wastewater management practices, are important factors contributing to a rise in dengue cases, driving up need for dengue testing.

## Industry Definition and Major Segments

Dengue testing examines if a person suffering from dengue-like symptoms has been infected with the dengue virus. Without lab testing, the infection is difficult to detect since symptoms may resemble those of other diseases, such as chikungunya infection.

The significant product types in the market are ELISA-based tests, RT-PCR based tests, and dengue IgG/IgM rapid test, among others. Hospitals and diagnostic centres, among others are the major end users of product in the industry.

## Market Trends

Over the last several years, the general incidence of dengue fever, as well as the disease's explosive outbreaks, has risen considerably. An increase in the number of public awareness programmes to educate people about the dangers of dengue fever, similarly, initiatives taken by the government and healthcare experts to reduce dengue transmission are likely to promote market growth throughout the projection period. ELISA kits outperform other testing methods in terms of sensitivity and performance. ELISA has become the preferred diagnostic method due to its great efficiency and sensitivity. Technological advances in ELISA platforms, such as robust test kits, given by many leading market participants, are driving market expansion.

## Key Market Players

The major players in the market are Abbott Laboratories, Abnova Corporation, F. Hoffmann-La Roche Ltd., Diasorin S.p.A., and InBios International, Inc, among others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
