These insights are part of the report, which is a major market contributor.

Pacifier Market Size

pacifiers are also known as teethingers, dummies, and soothers. They are made of rubber or plastic and are used to soothe and entertain babies. They are made from soft, flexible, and natural materials such as silicone, latex, and rubber. But silicone pacifiers have higher durability than those made from latex. These pacifiers are effective in calming babies after they have been born. Doctors also recommend pacifiers to prevent sudden infant death syndrome (SIDS). They can also be used as a transitional item that aids children in adjusting to new situations and relieving stress.
