The key highlights of the report include:

Market Overview (2016-2026)

Historical Market Size (2020): USD 8.9 billion

Forecast CAGR (2021-2027): 15%

The acne medication market is being driven by the increasing prevalence of acne and skin conditions across the world. The rising demand for acne medication can be attributed to the rising adoption of an unhealthy and sedentary lifestyle among the youth and middle-age

population. Excessive sebum secretion and hormonal changes are common among teenagers and young adults, leading to acne.

Therefore, acne medication is necessary for the youth demographic. Meanwhile, increasing beauty standards with the advent of social media and the internet are augmenting the popularity of skin-care solutions, providing an impetus to the market. The rising investments of key players towards enhancing acne medication solutions are expected to aid the market growth in the forecast period.

### Industry Definition and Major Segments

Acne vulgaris or acne is a common skin condition when hair follicles are plugged with dead skin cells and oil, causing whiteheads, pimples or blackheads. Although acne affects people of all ages, it is more prevalent among teenagers and young adults. Acne medication is used to treat the condition and it works by clearing away bacteria and drying up excess oils that lead to acne.

The acne medication market, on the basis of therapeutic class, can be segmented into:

- Retinoids
- Antibiotics
- Salicylic Acid
- Benzoyl Peroxide
- Others

On the basis of formulation, the market can be categorised into:

- Topical Medications
- Oral Medications

Based on type, can be segmented into:

- Prescription Medication
- Over-The-Counter Medication

On the basis of acne type, the market can be categorised into:

- Non-Inflammatory Acne
- Inflammatory Acne

Based on distribution channel, can be segmented into:

Retail Stores  
Pharmacies  
Online

The regional markets for acne medication include:

North America  
Europe  
Asia Pacific  
Latin America  
Middle East and Africa

Among these, North America represents a significant share of the global acne medication market.

#### Market Trends

Extensive research and development activities in the retinoids segment is expected to aid the market growth as it is highly efficient in clearing pores in order to treat moderate to severe acne. Progress in inflammatory acne medication research is expected to reduce the scarring and pain associated with the condition.

Furthermore, the rising disposable incomes in emerging markets like China, India and Argentina are expected to further enhance the product demand. The rapid technological advancements and increasing investments by the key players to develop innovative solutions with the advanced formulations are anticipated to significantly contribute to the market growth.

#### Key Market Players

The major players in the market are Almirall, S.A, Bausch Health Companies Inc., GlaxoSmithKline plc., Johnson & Johnson Services, Inc. and Galderma S.A. among others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
