

Las Vegas Metro Police Department adopts Intrepid Response to expand officer capabilities.

Las Vegas Metropolitan Police Department expands their response to day-to-day or emergency operations with Intrepid Response, a single common operating picture.

ORLANDO, FLORIDA, UNITED STATES, October 18, 2022 /EINPresswire.com/ -- [Intrepid Networks](#), an industry leader in public safety software solutions, announced today that the Las Vegas Metropolitan Police Department ([LVMPD](#)) has adopted the Intrepid [Response](#) mobile situational awareness platform. The platform expands its officers' capabilities with advanced mobile systems that enable communication, collaboration, and coordination with real-time access to critical information while in the field.

Las Vegas Metropolitan Police Department is at the forefront of innovative law enforcement technologies that promote community safety. We feel privileged to support their mission."

Britt Kane, CEO of Intrepid Networks

The platform also improves community safety and enhances situational awareness for incident response and day-to-day operations.

"Las Vegas Metropolitan Police Department is at the forefront of innovative law enforcement technologies that promote community safety. We feel privileged to support their mission with our Intrepid Response mobile platform," said Britt Kane, CEO of Intrepid Networks.

LVMPD selected Intrepid Response for its unparalleled situational awareness capabilities over a common

operating picture that connects personnel, sensors, assets, and decision-makers on one platform, to provide a rapid coordinated response to any incident. In addition to the platform's

capabilities, its user-friendly application interface and ease of integration with other systems were vital to LVMPD selecting the platform.

The Response platform features live mapping, emergency callout, team mobilization, secure digital media exchange, Push-to-Talk integration, and automated task management. Deploying this solution will drastically reduce response times, minimize excessive radio traffic, and enhance operational efficiency, cohesion, and safety.

About Intrepid Networks

Our mission is to provide critical operational support to both government and commercial organizations to instantaneously communicate, collaborate, and coordinate. We offer standard products for mission and business-critical operations and custom development for government agencies, including unique software applications, embedded firmware design, and low-cost communication hardware.
